Read the following passage and answer the questions.

Marcia says that all of her friends have a cell phone, but Marcia's mom doesn't want to buy her one. Marcia's mom doesn't want Marcia to play video games either. What is more, the Internet scares her. Marcia's mom says, "If Marcia has a cell phone, how do we know whom she is talking to? Video games are bad for you. The Internet is dangerous and uncontrolled. It's like having a gun in the house. We should just ban her from using the computer, and I'm not buying her a cell phone until she is eighteen. This is the only way we can be sure that Marcia is safe."

Marcia's dad disagrees with Marcia's mom. Although he agrees that there are some dangers to it, he likes the Internet, and finds it to be very useful. "The trouble is," he says, "We just can't stop Marcia from using the Internet, as this would put her at a disadvantage. What is more, I like video games. I think that, when played in moderation, they are fun. Obviously, it is not good to play them without restraint or self-control. Finally, I think Marcia needs a cell phone. We can't take these things away."

Read the following passage and answer the questions below.

In modern times , people have communicated by letter , telegraph ,and telephone .But no one method has become as widespread as quickly as the use of email . The first email message took place in 1971, and according to its sender , Ray Tomlinson ,it was probbaly the following : " QWERTYUIOP". What was significant about that ? Nothing , really . This is just the top row of keys on an English –language keyboard . Tomlinson was just testing out the system and using a nonsesne message . He had no concept that he was going to start a revolution in communication . Tomlinson was one of a group of scientists who were working on developing better computers. escientists at his site were able to send a message to a “mailbox” on the computer on their site. Other scientists could view the messages in the mailbox. But there were other computers at other sites where scientists were working on the same project. Tomlinson’s idea was to gure out a way to deliver messages to mailboxes on those remote computers. He used the @ sign to identify messages that were headed out of the local machine to the more distant ones. at was the start of the emailing systems that we still use today.

1- Put (T) for true and (F) for false.
