People need water to drink and to use in cleaning, cooking, farming and irrigating their lands. We can get water from rivers and lakes. But the main source of water is the rain. In the desert, people dig deep wells to get water. For keeping water from being wasted, people build dams for storing water in reservoirs that form behind the dams. Water is stored in water towers that supply all the houses with pure water. Our government has set up desalination plants for treating seawater and removing the salt.
