A. What do you think?

What is a slouch detector?
Do animals laugh?

What are super foods?
How old is cooking?

Which creatures are older than dinosaurs?

B. Read the texts and find out.

Have you noticed how often people, who spend a long time sitting at a desk, complain about back pain? When we've been sitting for a long time we are not conscious of our posture. Slouching affects the position of our neck and spine and causes back pains or even headaches. A small gadget that operates as a "slouch detector" comes to the rescue! The gadget monitors your neck and spinal position and buzzes, when the position is less than ideal! All you need to do is clip the gadget onto your shirt. However, you need to remember not to take any notice when the gadget buzzes for the wrong reason; for example when you lean over to answer the phone or get something from a drawer! Do you think the slouch detector is worth buying? Would you use it?

An Australian biogeneticist and his team began developing a vitamin-A-enriched banana to combat the destructive effects of vitamin A deficiency in sub-Saharan Africa. The banana was chosen as it made up a lot of the children's diet in the area, where about a third of the children under the age of 5 are at risk of going blind due to vitamin A deficiency. Provided that this type of "super banana" can actually be cultivated locally, and consumed by a substantial number of people, this type of food re-engineering might be extended to a wider range of products around the world. What do you think? Is intervening and reengineering crops a good idea?

Evidence has led scientists to suggest that early humans cooked their first hot meals more than 1.9 m years ago. The invention of cooking was a crucial factor in human evolution as it allowed our ancestors to expand their diet and to obtain more calories and nutrients from their food. Cooking softened food and made endless chewing redundant. This, according to scientists, resulted in the disappearance of large teeth which were replaced by smaller ones. It also reduced feeding times considerably and allowed early humans to develop different skills. According to Harvard evolutionary biologist, Richard Wrangham, controlling and using fire to cook was instrumental to the development of modern man. What do you think? *

Hagfish, according to fossil records, have existed for over 300 million years. They are often called slime eels because of the slimy substance they produce, with the purpose of damaging the gills of predatory fish. As a result, hagfish have no natural enemies. The Coelacanth is the most famous “living fossil”. It was supposed to have become extinct in the Cretaceous period, along with the dinosaurs, until a live specimen was caught in South Africa in the late 1930s. Since then, more coelacanths have been seen and photographed. A second coelacanth species was found in Indonesia in 1999. Coelacanths can be up to 2 meters long and feed on smaller fish, in deep, dark waters. Did you know? Have you heard of other prehistoric animals that are still alive? *

Research findings support the belief that a number of animals laugh when tickled! Scientists believe that nonhuman primates not only laugh but also have a sense of humor. Koko was a famous gorilla in California who learned more than two thousand words and one thousand American Sign Language signs, and demonstrated the ability to use different meanings of the same word. When asked about things she thought were hard, she signed, “rock” and “work”! She also tied her trainer’s shoelaces together before signing “chase” and turning to walk away! What do you think?

I'm not sure I'd feel comfortable using a gadget that makes so much noise in public...

I don't think I would, but I am sure many people would.

It sounds like a good idea, but there should be some restrictions ...

A lot of people will object to it, although it appears to solve ...

I'd have to do some research but I'm sure there are more ...

It's hard to believe but one has to accept that ...

3 Conversation

Presenter: We're at the edge of the desert, waiting for the falcon hunters to arrive. And here they come... I thought their car was white... This must be them. They must have been on the road longer than expected ... Welcome back. It's great to see you again Mr. Ali.

Mr. Ali: Thank you. Good to see you too! I wasn't sure you'd be here.

Presenter: Of course I'm here. I can't wait to hear about your exploits. Have you had a successful hunt?

Mr. Ali: Have we, indeed! We have been more fortunate than we could have ever expected. This has been the best trip ever! I wish we could have gone on for another two weeks!

Presenter: But you must be exhausted! And you must have been in the sun a lot...

Mr. Ali: You can tell, can't you? Oh, well, we must be looking the part. What can you expect after weeks of camping in the desert, but that's the way we like it!

Presenter: And, now? What's next?

Mr. Ali: Now, we are going to see our clients. My falcons are spoken for, so I won't have to look around for buyers. This is also important in our business...having good clients and keeping them happy! And of course, we're going to have our truck cleaned and serviced before we do anything else!

Presenter: Do you think of the financial gain while you're hunting?

Mr. Ali: No, not really. I only think of the hunt. You can't catch falcons if all you think about is how you are going to sell them. Falcons deserve respect and admiration! I often feel we have the best of both worlds; making a decent living while doing something we genuinely enjoy. There can't be too many people who can claim that!

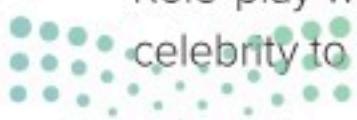

Presenter: You're quite right! I wish you continuing success in your endeavor and hope to catch up with you next year.

Mr. Ali: You're very welcome. It's really good to have the opportunity to talk about our trade and know that more people will hear about it.

1 Listen and Discuss

1. What do you think is the difference between a house and a home?
2. What are the most important things in your home?
3. Describe both the interior and exterior of your dream home.

1 What is home? A roof to keep out the rain? Four walls to keep out the wind? Floors to keep out the cold? Yes, but home is more than that. It is the laugh of a baby, the verse of a mother, the strength of a father, warmth of loving hearts, lights from happy eyes, kindness, loyalty, comradeship. Home is the first school . . . for young ones, where they learn what is right, what is good, and what is kind, where they go for comfort when they are hurt or sick; where joy is shared and sorrow eased; where fathers and mothers are respected and loved, where children are wanted; where the simplest food is good enough for kings because it is earned; where money is not as important as loving-kindness; where even the tea kettle whistles from happiness. **That is home!**

— Ernestine Schumann-Heink

2 No one realizes how beautiful it is to travel until he comes home and rests his head on his old, familiar pillow.

— Lin Yutang

3 Bricks and mortar make a house, but the laughter of children makes a home.

— Irish Proverb

4 The best way to keep children home is to make the home atmosphere pleasant—and let the air out of the tires.

— Dorothy Parker

5 A small house can lodge a hundred friends.

Ahmed: Where are you going to live when you start college in the fall?

Hameed: I don't want to live on campus. There's too much noise when you're trying to study, and there aren't enough places to go when you want to socialize. So, I'm going to get an apartment off campus.

Ahmed: Cool! What kind of apartment do you have in mind?

Hameed: Well, I'm hoping to find a large, modern place with an extra bedroom for visitors. It has to have parking. And, of course, it has to have a washer and dryer.

Ahmed: Hold on! Do you have enough money for an apartment like that?

Hameed: Why? Do you think it would be very expensive?

Ahmed: You are clearly out of touch with rental prices! You need a reality check. An apartment like that will cost an arm and a leg.

Hameed: Like how much?

Ahmed: We're talking megabucks—maybe fifteen grand a month.

Hameed: Fifteen thousand riyals? I had no idea. I thought it would be a lot less than that.

Ahmed: Only if you want to live in a tiny apartment way outside of the city.

Hameed: Well, maybe I shouldn't be in such a rush to move out. I could live at home with my parents just for the first year...

10 Writing

A. Look at the photos. Where do you think these houses are? What are they made of?

1. Read the text and find out.

- What is adobe?
- What is special about the house?
- Are the back and front of the house similar? How do you know?
- What is part of the floor made of? Why?

2. Read the text again, find out, and highlight.

- Which rooms does the writer mention?
- What can the writer see, smell, and feel in the house?

3. Would you want to live in a house with a glass floor? Why? Why not?

A home over the canyon

When people talk about unusual homes, I think of our friends' dream home in New Mexico, on which they spent all their savings building it.

On the outside, the house looks like most adobe homes in the area. Adobe is made from sand, clay, water,

and organic material that are shaped into bricks and left to dry in the sun. Our friends' house is a beautifully-designed, large adobe home with a drive and a large cactus tree near the entrance. It has soft lines, and is less angular than conventional urban homes.

When you go through the door, you find yourself in a beautiful, spacious room with large windows and sunlight streaming in. Large windows are unusual for adobe homes. But this is no ordinary home. Part of the house juts out of the adobe shell that can be seen from the street and stretches to the end of a cliff. You

walk past a kitchen fitted with a cast-iron stove and hand-made wooden cabinets that give off the most enticing smells of cumin and chilies and herbs. It is so real; you can almost taste the food.

The spacious room that you step into when you enter the house stretches in all directions. You walk towards the sitting area. When you get closer, you need to brace yourself as the most spectacular view imaginable unfolds before your eyes. All of a sudden, you are no longer stepping on wood, the floor is hard, and your footsteps make a strange resounding sound. You look down and wonder whether you have been transported in space and time; you are looking into the gaping canyon. You think you are falling into it; you can almost feel the air whooshing past.

Part of the floor is made of thick custom-designed glass. You might like it or hate it, but however you feel you have to admit it is unique. This is the way I feel about this house and the day I spent there. It was a unique, unforgettable experience even if I wouldn't choose to live with a glass floor over a canyon for the rest of my life. Would you?

B. 1. Choose a home to write about. It can be yours or another home you know well.

- Remember/think about what you see, hear, feel, and smell in various rooms of the house.
- Make notes in the chart and use them to write a descriptive essay about the house.

| Rooms and other places | I can see | I can hear | I can feel and/or touch | I can smell |
|------------------------|-----------|------------|-------------------------|-------------|
| Exterior | | | | |
| Garden | | | | |

My Grandparents' House

The home that means the most to me is my grandparents' house. Each time I go there, I feel a sense of comfort and warmth. Now that I'm in college, I don't get to spend much time there. But whenever I miss it, I just imagine it. When you first walk into my grandparents' house...

Writing Corner

When you write a descriptive essay:

- brainstorm about the topic and write down as many notes as you can about your memories and impressions of the house/place.
- make an outline of your essay and decide what each paragraph/section is going to focus on.
- include factual information, e.g. size, number of rooms, etc. as well as feelings/impressions.
- visualize the place you want to write about so you can help your reader visualize it too.
- use different senses, i.e. sight, feelings, smell, sound, and taste to make it more vivid.
- remember that smell is usually the most vivid and best retained memory.
- think of the first and last thing(s) you see, hear, feel, or smell (or almost taste) when you are there.

8 The Sporting Life

1 Listen and Discuss

Make a list of what you already know about the Olympic Games. Then read the passage and underline the facts about the Games that are new to you.

Fascinating Olympic Facts

The ancient Olympic Games began in Greece in 776 B.C.E. and were held every four years until 393 C.E. It wasn't until about 1,500 years later, in the mid-1800s, that the games were revived in Greece. But the Olympics didn't become the event we know today until 1896, when a French historian named Pierre de Coubertin had the idea of making the games international, and founded the International Olympic Committee.

Medals weren't always a part of the Olympics. Giving medals to winners is a practice that began in 1896, and between 1896 and 1904, the top prize was a silver medal.

The youngest person that has ever competed in the Olympics was Dimitrios Loundras, a ten-year-old gymnast on the 1896 Greek gymnastics team.

Lighting the Olympic torch does not involve a match. It is lit using only the light of the sun and a special mirror.

At various times, the Olympics have included such unusual events as a swimming obstacle race, a tug of war, and live pigeon shooting.

The gold medal is not made of gold! It's actually 92.5 percent silver with a covering of six grams of gold.

The marathon is an event named after the run of a Greek soldier, Pheidippides. In 490 B.C.E., Pheidippides ran from Marathon to Athens (about 26 miles, or 42 kilometers) to deliver news about the Greeks' success in a battle. Running through the mountains and rocky land was extremely difficult. After Pheidippides arrived in Athens and delivered his news, he fell down and died. The first modern Olympics in 1896 included a race of 26 miles (42 kilometers), called a *marathon*, to commemorate Pheidippides' run.

Because the Greeks originated the Olympics, the Greek team always leads the procession of athletes during the opening ceremony of the Olympic Games. They are followed by the other teams in alphabetical order. The hosting country goes last.

Dropping sports from the Olympics is not uncommon. In fact, many popular sports have been dropped through the years, including rugby, golf, baseball, and softball. Adding a new event can only happen if another one is dropped.

8 Reading

Before Reading

Which winter sports have you watched, heard/read about, or participated in? Where are winter sports more popular? Why?

A country born on skis

Norway, a small country of 5.5 million inhabitants, has won more Winter Games medals than any other nation. It became the first country to win 100 Olympic gold medals, and reached the 300-medal milestone in the Winter Games of 2010.

Norwegians go cross-country skiing , ski-jumping , or downhill skiing on weekends, on holidays, and after work. When the snow starts melting in spring, they move it up to the mountains. And if there is no access to snow, they skate on ice. 2,500 lit tracks all over the country make it possible for people to ski in winter, although it gets dark early.

Norwegians have enjoyed skiing for thousands of years. A rock carving in Nordland County in the north provides evidence that the use of skis dates back to the Stone Age. Until about a century ago, skis were the only means of transport in winter and essential for hunting.

Skiing did not become a mass sport until the mid-1880s when the first competitions were arranged. Sondre Norheim, who is considered the father of modern skiing, was the originator of the Telemark skis, which are narrower in the middle than at the front and back and have stiff heel bindings. The shape made turning easier, and the heel binding allowed skiers to jump from rooftops or over rocks without losing their skis.

Polar explorers made skis known internationally and demonstrated their unique merits on terrain that

could not be crossed any other way. Roald Amundsen was the first man to reach the South Pole in 1911, on skis. Fridtjof Nansen crossed the Greenland interior on skis in 1880. Other explorers have followed the routes used by these two famous explorers and skied to both the North and South Poles.

Annual cross-country events are organized throughout Norway, attracting a great number of participants. Such events are not restricted to athletes, but include "keep fit" categories that allow more people to participate. Enjoying the exercise and nature is as important as achieving the fastest time and winning prizes in these events.

Biathlon  was first included in the Winter Olympic program in 1960. It is a cross-country skiing race interspersed with shooting contests. Norwegians are very strong cross-country skiers and have won most of the cross-country skiing medals in the Winter Olympics over the years.

Alpine skiing  has also gained a lot of followers, as has freestyle , which is a relatively newer sport. Norwegians are among the world's best in freestyle.

Speed skating  used to be a large spectator and participation sport on a par with cross-country skiing. Cross-country skiing, ski jumping, and Alpine skiing seem to have taken over and overshadowed speed skating, although Norwegian speed skaters are among the best in the world.

In winter in Norway, every sheet of ice is covered with children playing hockey  or skating. Indoor rinks are also used for skating and ice hockey. While other Scandinavians huddle around fireplaces, Norwegians bundle up and go out skiing. This could explain the reason why they have won such an astounding number of medals in the Winter Olympics.

The objective of the game is to score goals by shooting the **puck**, a hard rubber disk, into the opponent's net. The players control the puck with a long **stick** curved at one end. They also wear a lot of padding and helmets to avoid getting hurt.

(4) _____

Players are not allowed to use their hands in order to redirect the puck nor pass it to their teammates, unless they are in the defensive zone. They may redirect the puck with any other part of their bodies, but not kick it.

(5) _____

The boards surrounding the ice keep the puck in the rink and are used to "**bodycheck**" opponents, i.e. push them against the boards in order to stop their progress. Play can also be stopped if a goal is knocked out of position. It is then restarted with a **face-off**, i.e. two players face each other on the ice and try to gain control of the puck that an official drops to the ice.

(6) _____

If an offensive player interferes with a goaltender's defense he is given a **penalty** and sent to the **penalty box** for two to five minutes.

A student with a parrot on his shoulder leaves a lecture theater. Another student follows him. He stops him and says, "I'm sorry to bother you, but I have to say, I was astonished by your parrot's remarkable reaction to the lecture on ancient history. He seemed frightened at the frightening parts, sad at the depressing parts, fascinated at the interesting parts, and amused at the funny parts. I could have sworn, I even heard it laugh. I have to say, I was amazed. Don't you find it surprising?" "Yes," he replies, "I was very surprised. He hated the class!"

A truck driver is driving a truckload of penguins to the zoo in the next town, when his truck breaks down. While he's working on the truck, another truck driver stops and asks if he needs help. The first truck driver says, "If I gave you \$100, would you take these penguins to the zoo?" The second trucker agrees to do it. Hours later, the truck driver is still trying to fix his truck when the second truck driver drives past with all of the penguins still in his truck. The puzzled first truck driver says, "Didn't you take them to the zoo?" The second truck driver says, "Yes, we went to the zoo, and there was money left over. So now we're going to a restaurant."

A grasshopper, a snail, and a centipede are relaxing in the grasshopper's house, when they realize that they are getting hungry. They decide that one of them should go out for a pizza. The snail says, "I'd go, but I'm kind of slow." The grasshopper says, "I don't mind going, but my hopping will shake the pizza and mess it up." So they decide to send the centipede. The snail and grasshopper wait and wait. The longer they wait, the hungrier they get. Finally, when an hour passes and the centipede still hasn't returned, the irritated snail and grasshopper decide to go look for him. They get as far as the front door where they find the centipede sitting there putting on his shoes.

8 Reading

Before Reading

1. What do you think each Hadith means? Discuss your thoughts in class.
2. Read the passage and underline important details about laughter.

Islam encourages smiling and moderate laughter.

For example, the following two Hadith indicate the virtue of smiling in Islam:

“Your smiling in the face of your brother is a charitable act.”
(Aladab Almufrad, 891)

“Don’t consider anything insignificant out of good things even if it is that you meet your brother with a cheerful face.”
(Sahih Muslim, 2626)

Laughter Really Is The Best Medicine

Are you feeling run-down? Stressed? Do you get sick easily? The solution to your problems may be surprisingly simple: Try laughing. Countless research studies have shown the amazing number of ways that laughter positively impacts both our mind and body.

Laughter has an immediate beneficial effect on our mood and sense of well-being. Generally speaking, the harder you laugh, the better you feel. But why is this? Research has found that laughter offers some of the same benefits as exercise. When you laugh, that laughter stretches, tones, and strengthens muscles in your face and body. It increases your heart rate and causes you to breathe faster, which increases oxygen levels in your body. According to William F. Fry, M.D., Associate Professor of Clinical Psychiatry at Stanford University, “Laughing 100–200 times per day is the cardiovascular equivalent of rowing for 10 minutes.”

One study even found that laughter can help people lose weight. Researchers discovered that laughing out loud for 10–15 minutes a day can burn up to 50 calories. However, this certainly doesn’t mean you should give up a visit to the gym for a hearty laugh. At the rate of 200 calories per hour, it would take over 17 hours of non-stop laughter to lose a single pound (450 grams)!

People who laugh often have other physical advantages as well. They tend to have lower blood pressure and lower stress levels. They tend to get sick less often because laughter has been shown to increase infection-fighting antibodies. Laughter has also been found to help fight disease and to help people recover from illness. This has led many hospitals to create programs designed to make patients laugh. For example, it is quite common to see a red-nosed clown joking with young patients in the pediatric ward. Hundreds of hospitals also provide patients with “humor carts,” loaded with humorous cartoons, DVDs, comic books, and funny props.

Laughter has also been found to make people alert, stimulate the brain, and enhance learning. It also helps people to be more productive, to communicate more effectively, to sleep more soundly, and to form friendships more easily. In the mid-1990s, a doctor from India was struck by these benefits and brainstormed a way to bring more laughter into his patients’ lives. The doctor, Madan Kataria, gathered a group of people together in a local park to practice laughing as part of a “laughter club.” During the club meetings, Kataria would prompt members to laugh in a variety of ways.

For example, he would tell them to greet one another with a laugh, or to laugh like a lion. Although Kataria discovered that fake laughter produces the same health benefits as genuine laughter, he was gratified to find that it usually didn't take long for fake laughter to turn into real laughter.

This idea of laughter clubs has been extremely successful. There are now more than 8,000 laughter clubs in 60 different countries. It seems laughter is indeed infectious! Now that you know the health benefits of laughter, think about ways you could bring more laughter into your life. Whether you go to comedy clubs, joke with a friend, or watch more comedies, your mind and body will soon be enjoying the many benefits of a good laugh.

After Reading

Answer **true** or **false**.

1. _____ Laughter increases oxygen levels in your body.
2. _____ People with lower stress levels tend to get sick more often.
3. _____ Clowns are a common sight in hospital emergency rooms.
4. _____ The first laughter club was started by an Indian doctor.
5. _____ Fake laughter does not produce the same health benefits as genuine laughter.
6. _____ There are about 800 laughter clubs in the world today.

10 Writing

A. What is a sitcom?

1. Read the text and find out about sitcoms.
2. Think of sitcoms you have watched. Do you enjoy watching them? Why? Why not?
3. Who are your favorite characters? Why?

A sitcom is a situation comedy without an ending. It consists of episodes, but the situation goes on. The television sitcom was born in the 1940s and 1950s. It had originally existed as a radio show that listeners would tune into every week to spend some time with familiar characters they grew to know and liked.

When television arrived in the late 1940s, shows were filmed in front of a live studio audience, with three cameras recording everything for later editing. In the 60s sitcoms combined fantasy with comedy and used a laugh track instead of a live studio audience. In the 70s social issues were included, but in the 80s there was a return to the original family concept, the most important success factor behind sitcoms.

Nowadays, shows are filmed with a single camera, on location or on studio sets, with no laugh track or live audience.

2 Reading 

Before Reading

1. Has anyone ever played a trick on you? If so, explain what happened.
2. Have you ever played a trick on someone else? If so, explain what you did.

Can You Believe They Believed It?

In many countries around the world, the first day of April is a day for playing tricks and pulling pranks. Many of the most amusing and memorable tricks that have been played on this day have been perpetrated by the media.

Perhaps one of the funniest pranks to have ever been pulled off happened on April 1, 1957. On this day, a well-respected British news show called *Panorama* aired a segment focusing on a supposed spaghetti harvest in southern Switzerland! The anchorman explained that the mild winter had resulted in a huge spaghetti crop. As the anchorman gave details about the "spaghetti crop," video footage was shown of Swiss people pulling fresh, long strands of spaghetti off of "spaghetti trees" and putting them in baskets.

Convincing viewers wasn't very difficult. Apparently, this segment was realistic enough to fool a huge number of people. Hundreds of fascinated viewers called into the

television station wanting to find out how they could grow their own spaghetti tree. They were told, "Place a sprig of spaghetti in a tin of tomato sauce and hope for the best." As one studio worker remembers, "The more people called, the harder we laughed."

Another nationally broadcast prank occurred in Sweden in 1962. At the time the country had only one television channel, and it broadcast in black and white. The station had their technical expert announce to the viewers that a new technology had been created. Astonished viewers listened as he explained that this technology would make it possible to see color images on their black and white television sets. Accomplishing this was easy, he assured the audience. He explained that all that viewers needed to do to convert their black and white televisions to color was to pull a nylon stocking over the screen. He also advised moving one's head very carefully back and forth to see the best picture. Many viewers got excited, and thousands tried it. Today many Swedes still recall family members running around the house trying to find nylon stockings to place over their television set.

Another remarkable prank was pulled by an Australian news program in 1975. On the program that evening it was announced that Australia would be converting to “metric time.” It was explained that under metric time, there would be 100 seconds in a minute, 100 minutes in an hour, and 20 hours in a day. It was also explained that seconds would become *millidays*, minutes would become *centidays*, and hours would become *decidays*. The report had many convincing details, including an interview with South Australia’s deputy premier and a shot of Adelaide’s town hall clock, with its “new” 10-hour metric clock face. Many people fell for the trick. Some even got angry about it. One viewer was particularly irritated because, as he explained,

he had just bought a new clock and thought that it was now useless.

Sometimes it seems the sillier the hoax, the more likely people are to fall for it! So the next time you hear something that sounds too silly to be true, look at your calendar and make sure that it isn’t April first!

Circle **True** or **False**. Then read and check your answers.

- 1 Many Japanese restaurants serve a kind of fish that can kill diners within hours if it is not prepared properly.
- 2 Eating chocolate has been linked to an increase in heart disease.
- 3 Fresh vegetables are healthier than frozen vegetables.
- 4 Apples, potatoes, and onions all taste the same when eaten while holding your nose.

1 Blowfish, which are considered a delicacy in Japan, contain deadly toxins. If not properly prepared, eating blowfish can lead to death by poisoning. Victims usually die within 4 to 24 hours of consuming the fish. Blowfish diners count on specially licensed chefs to prepare the fish safely.

3 Frozen vegetables are at least as nutritious as fresh vegetables, and may sometimes actually be healthier. Fresh vegetables are at their nutritional peak at the moment they are picked. However, they often spend days or weeks in transit, in the produce aisle, and in your refrigerator. Over time, vegetables lose vitamins and minerals. However, frozen vegetables are picked and frozen at their peak. Freezing locks the vitamins and minerals in. When you do buy fresh vegetables, try to pick out ones that seem fresh and have been grown locally.

2 A number of studies have shown that chocolate consumption may reduce the risk of developing heart disease and cancer. Scientists believe that antioxidants reduce the chances of developing these diseases. Antioxidants are also thought to enhance blood flow and help maintain healthy cholesterol levels. Dark chocolate and cocoa powder are particularly rich sources of antioxidants. In fact, ounce for ounce, dark chocolate and cocoa have more antioxidants than antioxidant-rich foods like blueberries and green tea. Of course, it's not good to eat too much chocolate, but it's not a good idea to cut chocolate out altogether, either.

4 Up to eighty percent of taste comes not from our taste buds, but from our sense of smell. Taste buds allow us to identify bitter, salty, sweet, and sour flavors. But we depend on the smell of foods to give us most of our sense of flavor. So without smelling the aroma of a food, it is difficult to distinguish one flavor from another. (Incidentally, this is why food loses its flavor when you have a stuffed-up nose!)

5 Many food items with a deep red color, including fruit juices, candies, and gelatin, include a dye called cochineal or carmine. This dye comes from the shells of the female cochineal insect, which is found in South and Central America. The dye has been used for centuries and dates back to the Aztecs.

8 Reading

Before Reading

Read the article and underline the information that tells you how certain popular foods were discovered.

Accidental Food Discoveries

Can you imagine a world without cool, creamy ice-cream cones? Isn't it depressing to imagine life without chewy, delicious, chocolate chip cookies? And who could get by without salty, addictive, crispy potato chips? Yet all these treats are fairly recent inventions that may never have come into existence if it weren't for lucky accidents.

Have you ever enjoyed the cool refreshment of a popsicle on a hot summer day? If so, you have an 11-year-old boy named Frank Epperson to thank. One winter day in 1905, young Epperson was making soda pop by mixing powdered soda and water. He accidentally left the mixing bucket outside with the mixing stick in it overnight. That night, the temperature reached freezing. In the morning, Epperson discovered that the fruit-flavored liquid had frozen to the stick. Although he tried and liked his invention, it wasn't until eighteen years later that it occurred to him to turn his invention into a business. Epperson's children referred to this treat made by their pop as a *popsicle*. That name stuck and eventually became the official name. Today, popsicles are enjoyed by millions of people around the world.

But, perhaps your dessert of choice on a hot day is an ice-cream cone. If so, you should be glad for the unexpected event that brought two men together at the 1904 St. Louis World's Fair. An ice-cream vendor named Charles Menches was doing such booming business that he ran out of bowls to put the ice cream in. The vendor next to Menches was a young Syrian immigrant named Ernest Hamwi. Hamwi was selling a Syrian treat called *zalabia*, a crisp, wafer-like pastry. Hamwi came up with a solution to Menches' quandary. Hamwi rolled some of his warm pastry into a cone so that Menches could put ice cream inside. In that instant, a favorite international hot weather treat was born.

Of course, not everyone is a fan of frozen treats. Some prefer the indulgence of delicious freshly baked goods, like chocolate chip cookies. These people should be grateful for an accidental discovery made by an American housewife in 1930. One day Ruth Wakefield was making chocolate cookies when she realized that she had run out of baker's chocolate. Wakefield decided to substitute broken-up pieces of a chocolate bar she had on hand. She assumed that the small pieces of chocolate would melt and mix into the batter. However, after taking the cookies out of the oven, Wakefield discovered that the chocolate hadn't melted. Instead, there were little chips of chocolate throughout the cookie. Much to Wakefield's delight, the chocolate chip cookie proved to be a great success with her family and guests. Wakefield sold the recipe to the chocolate company Nestlé® in exchange for a lifetime supply of chocolate chips. It wasn't long before the chocolate chip cookie became a world-famous treat.

But, if crunchy, salty treats like potato chips are your preference, then you owe a debt of gratitude to a cranky chef and a picky diner who lived over 150 years ago. On August 24, 1853, George Crum was working as a chef in a restaurant when he became frustrated with a customer. The customer had repeatedly sent back his French fries, complaining that they were too thick and soggy. Fed up, Crum decided to teach him a lesson. Crum sliced the potatoes as thinly as possible and fried them in grease. To Crum's astonishment, the customer thought the chips were delectable. They became a regular item on the restaurant's menu and, in time, became a staple of the global fast food industry.

Clearly not all accidents are bad. Some have made our lives richer, sweeter, and tastier!

Too Much Seafood

A few years ago, we were at a famous seafood restaurant. A friend of ours went overboard and proceeded to order almost everything on the menu. Soon, immense amounts of seafood started arriving on large platters. We ended up with a feast that could have fed twenty starving people, not six. It was all delicious but there was too much of it. Three of the group were determined to clear everything, so they continued gobbling down fish, seafood, salad, French fries, anything that was still on the table.

Three hours later, we split an exorbitant check among us and walked back to our hotel, feeling unpleasantly full. As expected, we all got sick. Our extravagant friend, who had eaten most of what he had ordered, was taken to the hospital. The rest of us were given strict orders to only consume liquids and stay in bed for the rest of our stay.

Pepper Sauce and Truffle

I was flying back home from France. I had been given a first class seat because the plane was overbooked and my seat had been given to someone else. I did not, of course, mind the change one bit.

I had been traveling on a very tight student budget, and had been trying to cut down on expenses, so I tended to skip meals quite often. After the plane took off, I realized that I was famished. Appetizing smells wafting my way from the galley did nothing to reduce my hunger. Fortunately, we were served very soon. I tasted the food and was truly amazed. It consisted of the most succulent, tastiest bon filet in pepper sauce that I had ever had. It was served with truffles and baked baby potatoes with herbs. The pepper sauce was delicious as were the truffles. I decided that I rather liked flying first class!

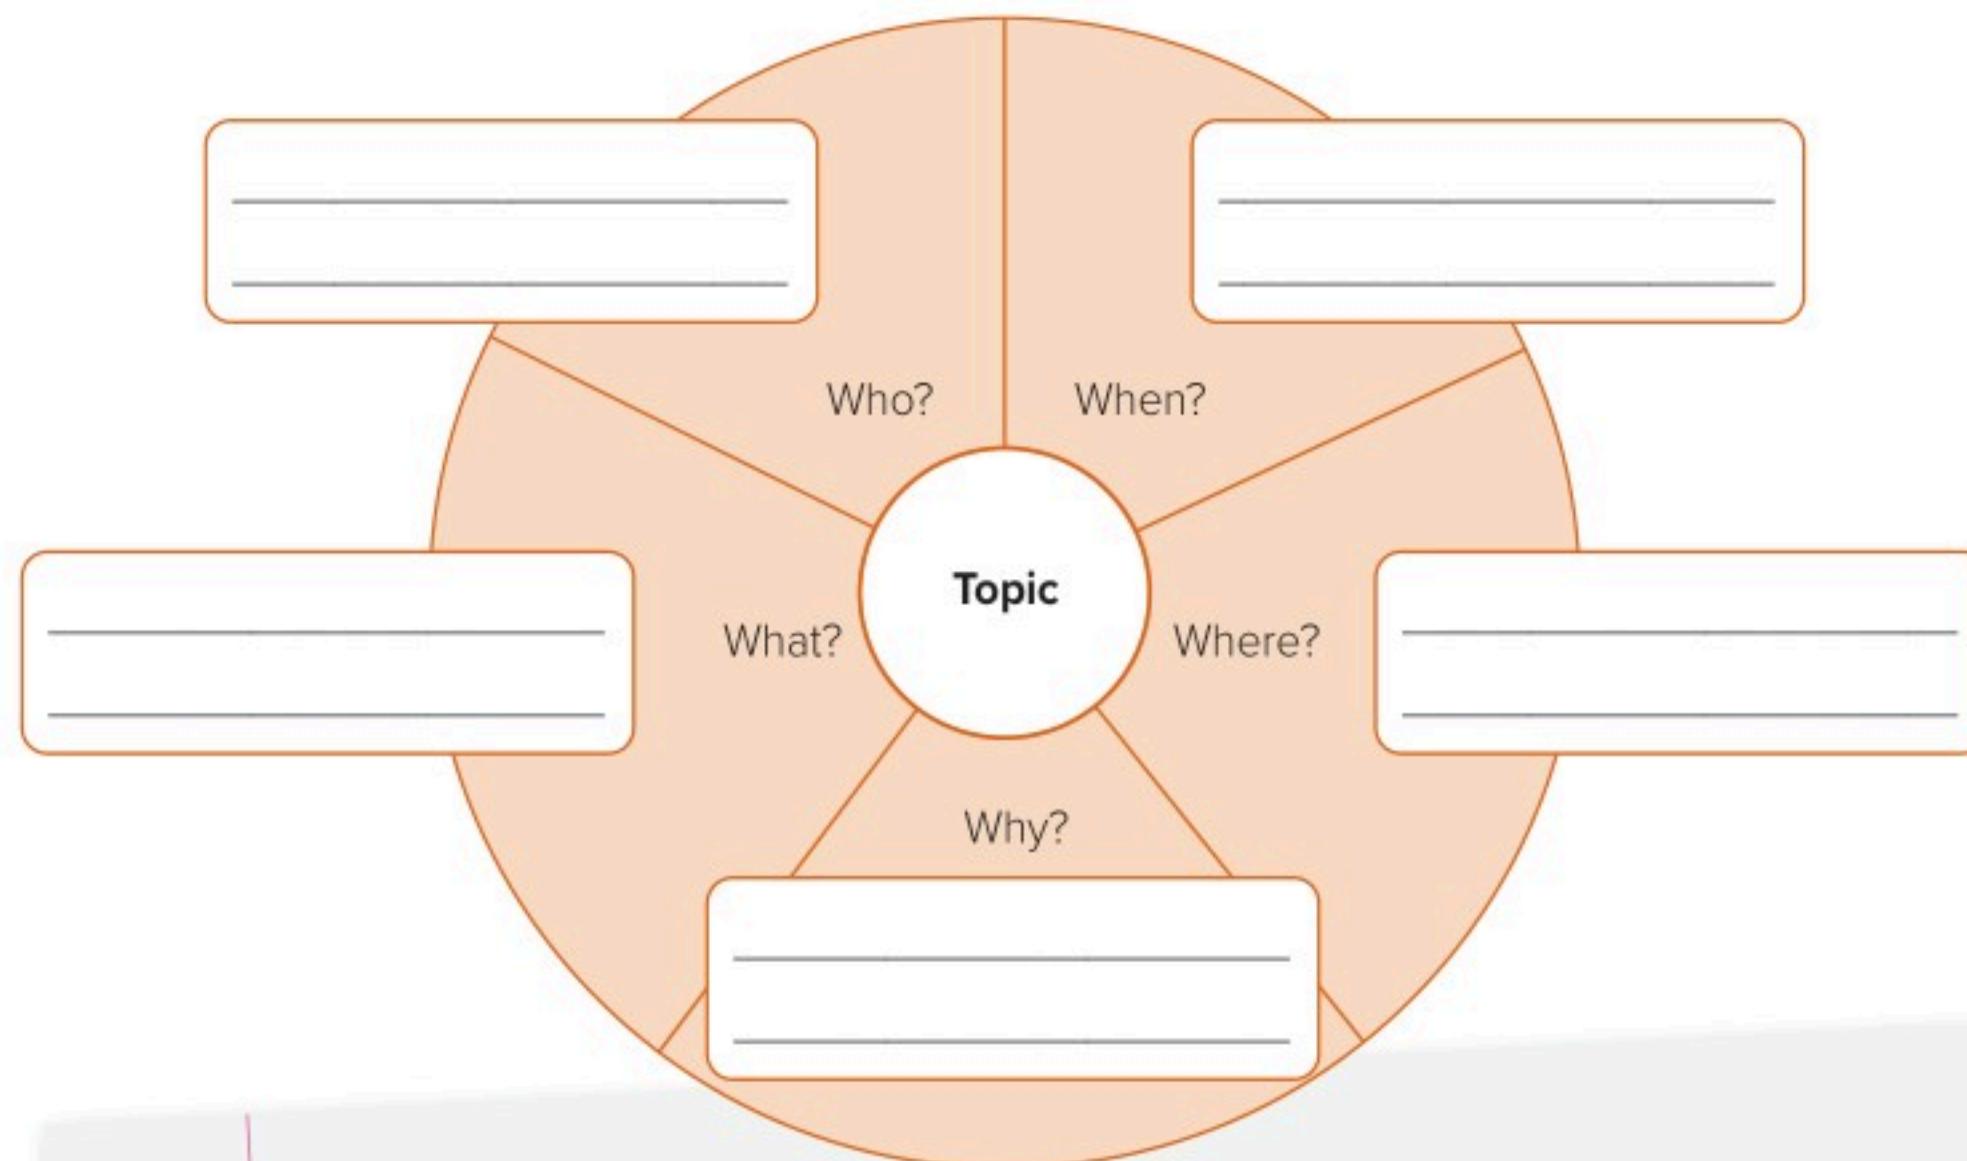

3. Read through the texts and find the words or phrases. Can you think of other words or phrases that you could use instead? Look them up in your dictionary and compare in class.

A Memorable Holiday Dinner

I'll never forget a meal I had during my freshman year of college. Most students went home for the holidays, but some, like me, who came from different countries, stayed on campus.

Although I had always looked forward to the big holiday dinner at home, this year I figured I would make do with a sandwich. But then I talked with a few other students who had stayed, and we came up with a plan to whip up our own holiday dinner...

11 Amazing Animals

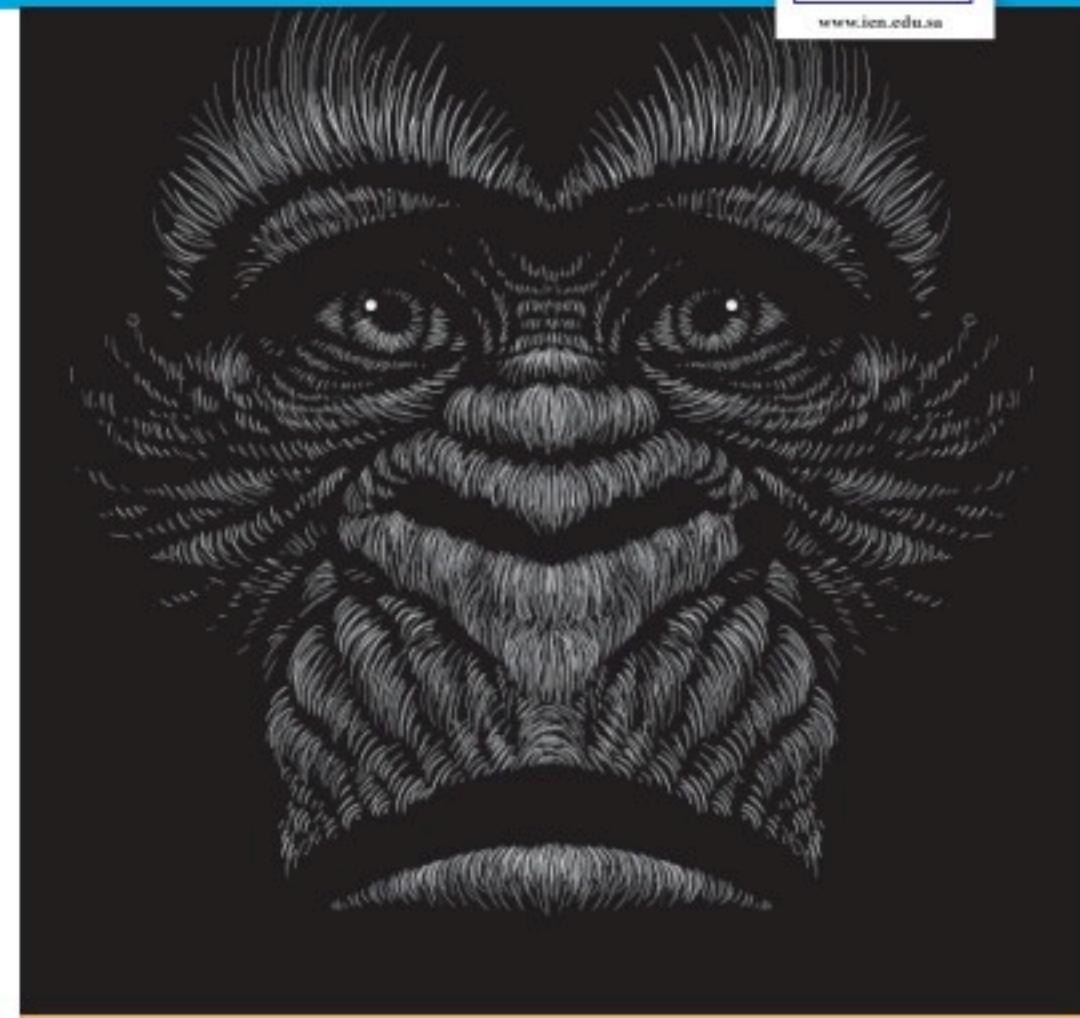

1 Listen and Discuss

1. In what ways are animals similar to humans?
How are they different?
2. Do you think animals and humans can communicate with each other? If so, in what ways?

Punxsutawney Phil is easily the most famous groundhog in the world. Phil lives in the small U.S. town of Punxsutawney, Pennsylvania, and is cared for by the townspeople. However, every February 2nd, Phil is placed in the ground at Gobbler's Knob, where he carries on a tradition that is over 100 years old. Many people believe the length of the winter can be predicted on this day, called Groundhog Day. It is said that on this day when Phil emerges from his hole, if he sees his shadow, there will be six more weeks of winter weather. If Phil does not see his shadow, spring will arrive early. Can the duration of winter really be predicted by a groundhog? Probably not, but the town has a great time celebrating this tradition.

Koko was a famous gorilla who used human sign language. Koko was taught sign language by psychologist Penny Patterson when Koko was just a baby. Patterson was studying whether gorillas could be taught to communicate. Although the study was only supposed to last a couple of years, Patterson and Koko developed a lifelong bond and worked together ever since. Koko began by learning basic words like *eat*, *drink*, and *more*, and eventually learned abstract ideas such as *love*, *jealous*, and *shame*. It is believed that Koko could sign over 1,000 words, and that she understood about 2,000 spoken words. Koko was also famous for having pet kittens. She was always extremely gentle and affectionate with her kittens.

A mouser is a cat that is kept for the purpose of catching mice. In England, there has been a mouser at the Prime Minister's residence for centuries. The most popular of these cats was a stray named Humphrey who, in 1989, was the first cat to receive the official title "Chief Mouser to the Cabinet Office." His care cost 100 pounds and was paid from the department's budget. It was said to be far cheaper than the fees previously paid to exterminators. Humphrey, who was beloved in the UK, retired in 1997.

One day in 1969, John Rendall and Anthony Burke saw a real live lion cub in a London department store window. Feeling that a lion should not be kept this way, they bought him and took him home to live in Rendall's basement. The lion, whom they named Kristyan, is said to have been an affectionate and extremely cooperative cat who even used a giant kitty litter box. Kristyan was pampered. He was brought on drives, strolls through the neighborhood, and even to restaurants. But when Kristyan grew to almost 200 pounds (90 kilograms), it was decided that he should be released into the wild. Kristyan was brought to Africa where he adapted to life in the wild and eventually became the leader of a group of lions. A year later, Rendall and Burke traveled to Africa to say goodbye. They were warned that Kristyan would not remember them. However, when Kristyan saw his old friends, he ran towards them, stood on his back legs, and joyfully gave each of them a long and loving embrace.

4 Conversation

Sami: I'm interested in speaking to someone about horse training. A friend of mine suggested I come here.

Omar: What kind of problems are you having with your horse?

Sami: He's a beautiful, strong, and affectionate horse, but he's driving me crazy. He won't follow instructions. He will gallop instead of cantering, he won't turn when I need him to, and if he spots a patch of grass, he'll head straight for it and ignore me completely.

Omar: I gather you have a young stallion. I will check the schedule and we can arrange training sessions for you and your horse. **Hang in there!**

Sami: OK, but in the meantime, I really need some advice. How should I handle him when he disobeys?

Omar: Well, I can try and give you a few tips now. You say he'll head straight for a patch of grass when he sees one. Do you let him do that when you are out riding?

Sami: Well, sometimes. But only if I want to stop for a minute or so.

Omar: You need to set rules and then stick with them **24/7**. If you're not consistent, he's not going to learn.

Sami: OK. But when he is all friendly and nice, it's hard not to let him do what he wants.

Omar: Look, I'm going to **get to the point**. It sounds to me like your horse is **calling the shots**. You need to be firmer. If you train your horse not to do something then suddenly let him do it, you'll be **back to the drawing board**.

8 Reading

Before Reading

In what ways do people benefit from animal companionship?

Animal Heroes

One night, Pilar was in a deep sleep when she was woken by her cat Inti. Inti was meowing wildly outside Pilar's bedroom and throwing himself against the closed bedroom door. When Pilar opened her eyes, she saw that her bedroom was filling with smoke. As she escaped her house with Inti in her arms, she saw that a fire was blazing in her kitchen. Pilar could easily have lost consciousness from breathing in the smoke, but Inti would not let that happen. Even though Inti could have escaped the house through a cat door, he wouldn't leave Pilar. A fireman at the scene said, "Without question, that cat is responsible for saving his owner's life. He should be honored as a hero."

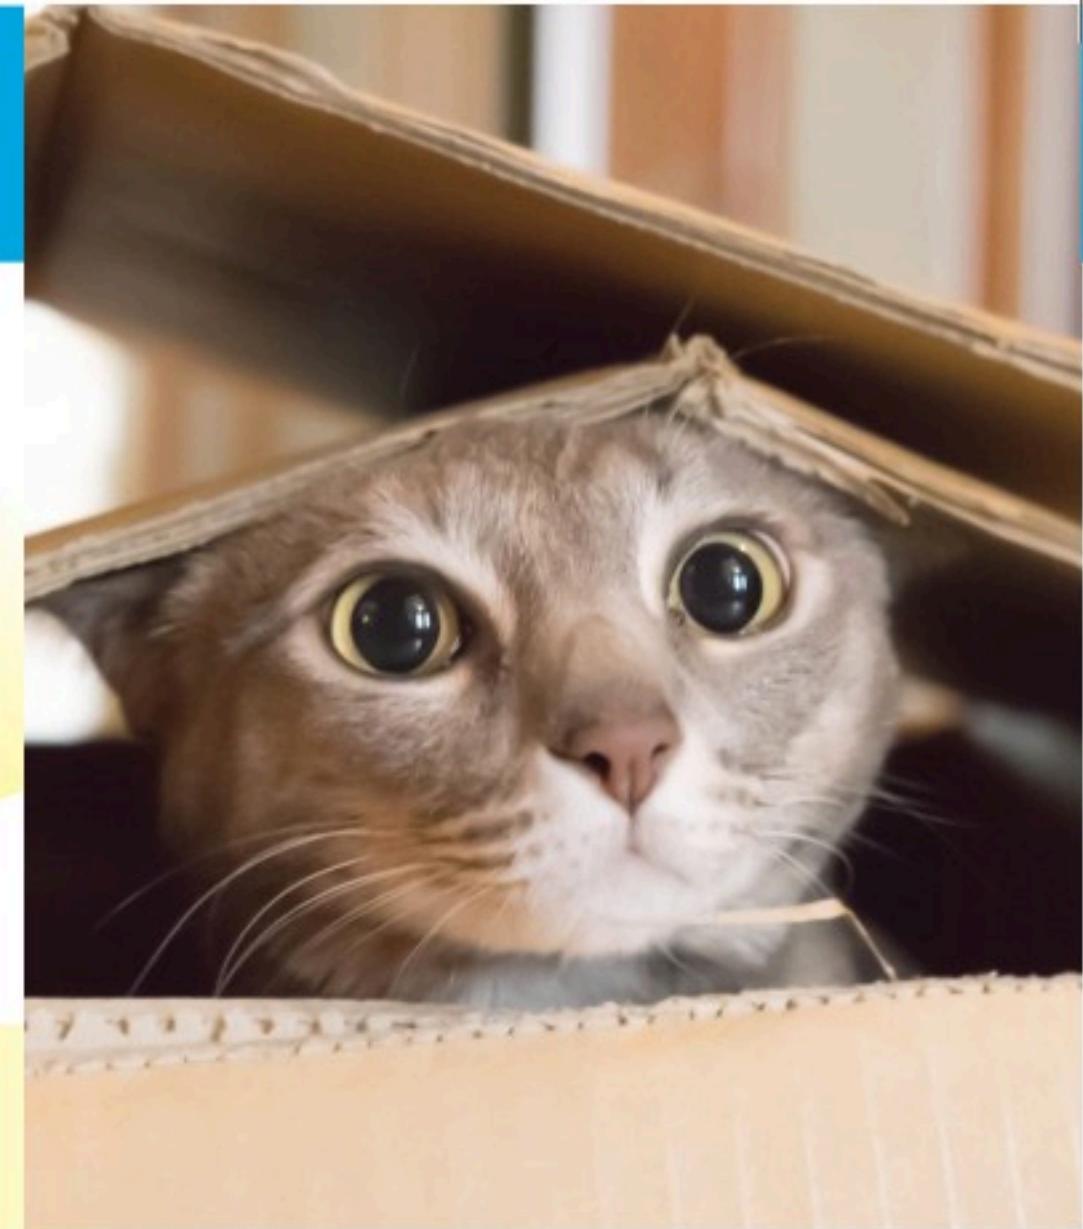

As amazing as this story is, it is not as uncommon as you may think. There are countless stories of animals coming to the aid of humans in life-threatening situations. Animals are said to have a sixth sense for danger. Often they are alert to danger before humans are and have used this awareness to protect humans from harm.

Take the example of Charlotte Lee and her horse, Thunder. One warm, summer night, the whole family was asleep with the windows open. It was normally very quiet where they lived. There were only a few farm houses scattered about the area and hardly any traffic. All of a sudden, there was a loud crashing noise from the stable. Charlotte woke up with a start, and her heart pounding, as the noise continued. She was so frightened, she froze; no matter how hard she tried she could not move. The noise stopped as suddenly as it had started, and she heard a horse galloping towards the house. The next thing she saw was Thunder standing outside her window, neighing and shaking his head as he stomped on the wooden

porch. She knew enough about horses to know that Thunder was disturbed for a reason, and wasted no time speculating. She quickly got everyone out of the house before the earthquake hit. Part of the roof caved in and crashed into her room. Thunder had deliberately saved her life.

Yet it is not only domesticated animals who have acted heroically. There are also stories of wild animals coming to the rescue of humans. One animal known to be a friend and protector of humans is the dolphin. Dolphins are considered to be among the most intelligent of animals. On dozens of occasions, they have used this intelligence to come to the aid of humans in dangerous situations. One such story involves a surfer named Todd Endris. Todd was surfing with his friends when he was attacked by a 13-foot (4-meter) shark. In the middle of the attack, a group of dolphins came to his rescue by forming a protective ring around Endris until he could get safely to shore. Without the help of the dolphins, there is little chance that Todd would have survived.

At times, even animals commonly considered aggressive and dangerous have come to the aid of humans. One famous case involves Binti Jua, an eight-year-old female gorilla who lives at the Brookfield Zoo in Illinois, U.S.A. Binti was celebrated as a hero when she protected a three-year-old boy who fell into the walled gorilla area. Binti picked up the unconscious boy, carefully cradled him in her arms, and brought him to the zookeeper's door so that he could be taken out. After four days in the hospital, the boy recovered completely.

No one is sure why animals have so often come to our aid. However, it is clear evidence of the deep and powerful bond between humans and animals. It is important that we respect this bond by treating animals with the care and compassion that they often show us.

All About Dolphins

Dolphins are marine mammals that are claimed to have evolved from land mammals some 50 or 60 million years ago! Studies indicate that they are closely related to hippos, camels, and cows! There has been an unending debate on the exact origin of dolphins and whales that is likely to continue for years to come.

There are 32 types of dolphins that live in salt water. Dolphins eat about 20 to 25 kilos of fish per day. Their eating habits vary depending on the area and the time of year. If there is an abundance of fish, they will happily consume as much as they need. Interestingly, dolphins regulate their food intake according to the fat content of the fish available, and their hunger! In this sense, they can probably control their food intake more efficiently than humans! Did you also know that their brains weigh more than ours?

Dolphins can:

- recognize themselves in a mirror
- scan objects in the water using sonar
- sleep with one eye closed
- whistle and recognize each other by their whistles
- go to a depth of about 260 meters

There is mutual interest between dolphins and people. They are as interested in observing us as we are in them.

Dolphins love having fun, communicating, and playing. They are also keen on helping and supporting their own kind and other species that are in danger.

The bottlenose dolphin is the most studied and familiar to people, with a life expectancy of about 40 to 50 years. Bottlenose dolphins show an extraordinary connection with humans and have rescued injured divers repeatedly.

These wonderful creatures deserve our admiration and respect and need to be protected.

The Peregrine Falcon

I've always liked falcons. I think their speed, marksmanship, and strength are unmatched. I have particularly admired Peregrines for their speed and hunting skills, but was not sure about their origin and habitat. It wasn't until I researched these incredible hunters that I discovered they could be found anywhere in the world.

The Peregrine is the world's most widespread bird of prey. The name of the species means "wandering falcon" ...

Writing Corner

When you write a descriptive essay about a species:

- try not to copy the information that you have found as it is; read it, make notes, and rephrase in your own words.
- make the description more attractive for your reader by adding personal feelings and opinions.
- notice that when referring to the animal you may repeat its name, use a pronoun, or a distinguishing feature, e.g. these incredible hunters, or refer to it through its category, e.g. this bird, these creatures, etc.

Use *all*, *both*, *neither* and *none* to compare two or more things, places, animals or people.

All tigers, cheetahs, leopards, and lions are big cats.

Both cheetahs and leopards are fast animals.

Neither tigers nor lions can be domesticated.

None of the big cats can be domesticated. They are all wild animals.

Both... and... / Neither... nor... / Either... or...

Both...and, *neither...nor*, and *either...or* are all paired conjunctions. They are used to link two words, phrases, or clauses of the same type. For example, nouns are linked with nouns, adjectives are linked with adjectives, and verbs are linked with verbs.

My favorite animal is **either** an elephant **or** a camel.

Both camels **and** elephants are intelligent animals.

When connecting two subjects with *both...and*, be sure to use a plural verb.

12 What Would You Do?

1 Listen and Discuss

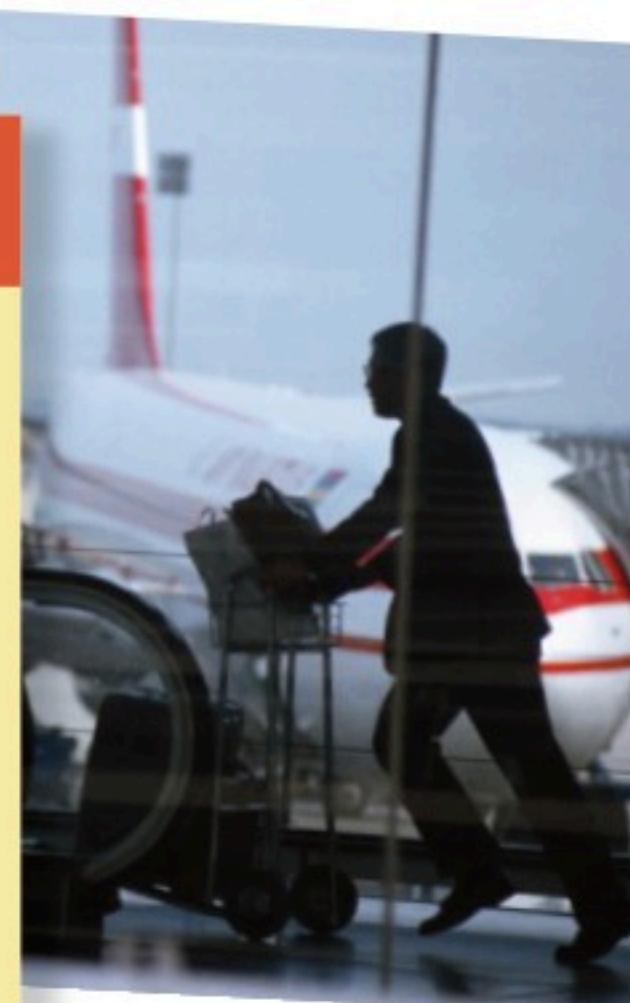

1. What do you think the words *moral* and *ethical* mean?
2. Have you ever been tempted to do something that wasn't right? Explain.
3. Do you think in every situation there is always a clear right and wrong thing to do?

① Dilemma

Russ is at the airport to catch a flight. He is on his way to his brother's wedding. His flight is about to leave. As he runs through the terminal to his departure gate, an elderly man suddenly slips and falls in front of him. The man cries out in pain. Russ knows that if he stopped to help the man, he would miss his flight. If he missed his flight, he would miss his brother's wedding. Russ runs past the man as if he hadn't seen him.

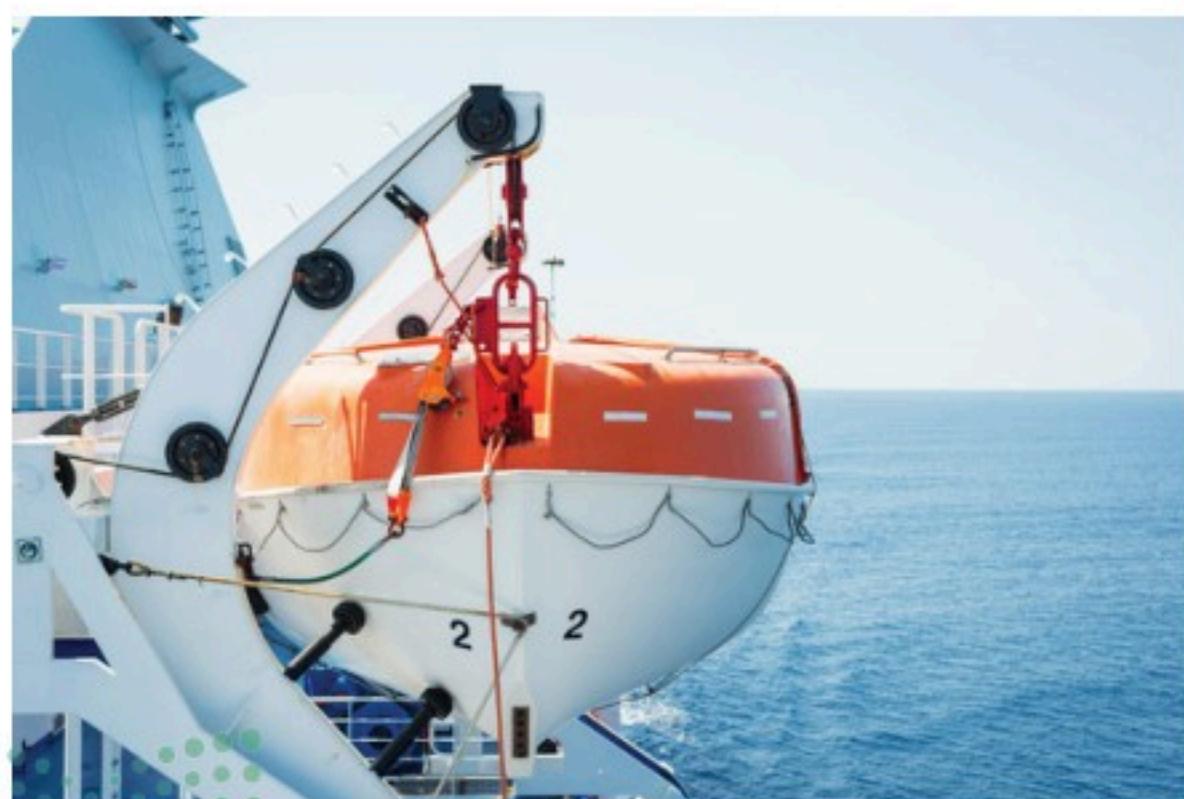

Would you have done what Russ did?

② Dilemma

Mike is taking an extremely important history test. The test will determine whether he passes the class. Mike has been studying for the test day and night. He feels well prepared, but when the test is in front of him, Mike's mind goes blank. He can't remember anything. It is as if he had never studied. Sam is the best student in the class and is sitting right next to Mike. Sam's paper is close enough for Mike to see the answers. The teacher is not paying attention. Mike knows that if he copied Sam's answers, the teacher wouldn't see.

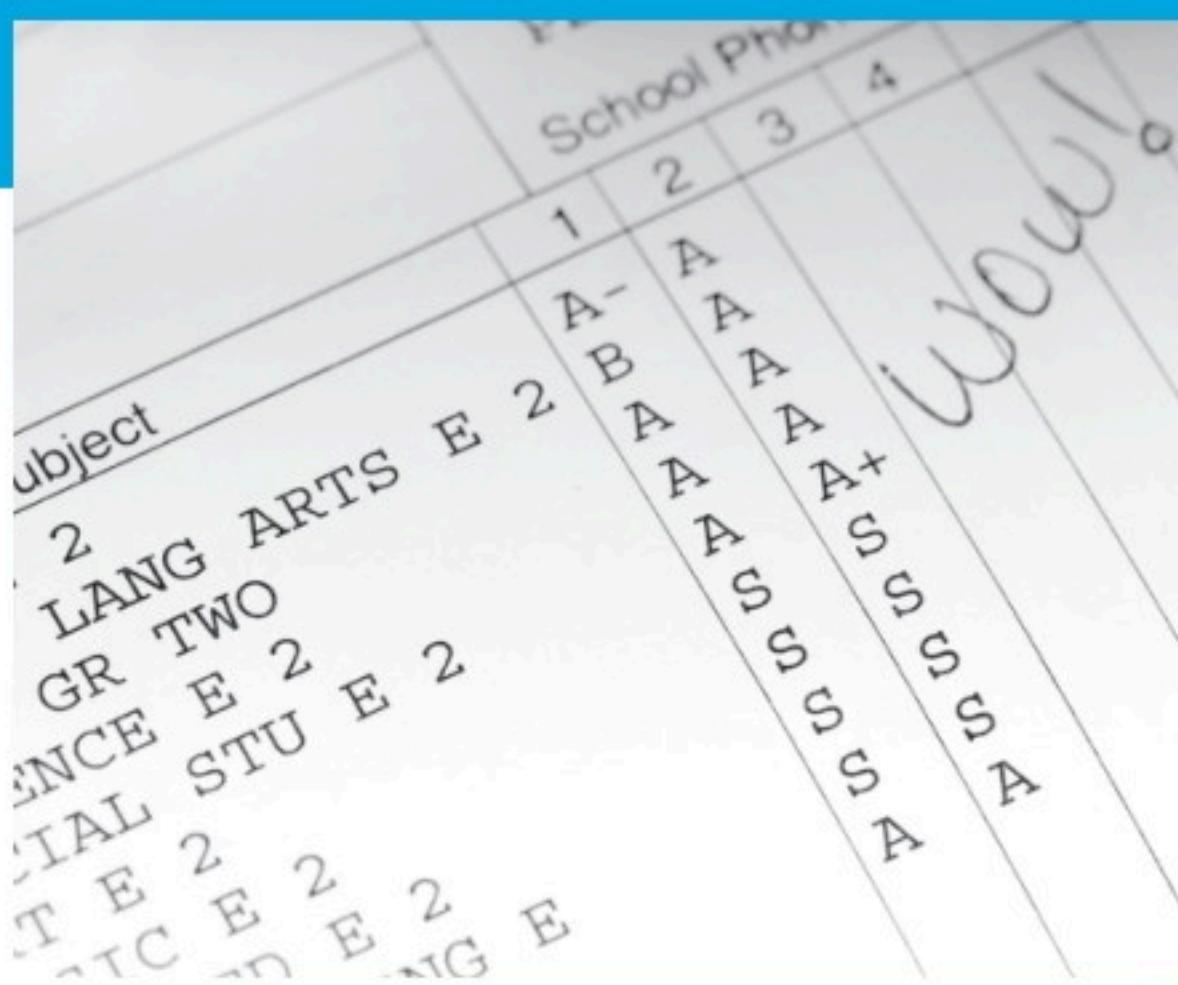

What would you do if you were Mike?

③ Dilemma

A ship strikes an iceberg and ten passengers crowd into a lifeboat that is only intended to hold nine. The lifeboat slowly starts to sink because of the extra weight. If it does, all ten passengers will die in the freezing water. The captain considers his choices and decides to force the weakest individual out of the lifeboat. He reasons that if he did nothing, everyone would drown. This way only one person drowns, and this person would have drowned anyway. Others on the lifeboat feel that this choice is morally wrong. They say that if he did nothing, then even if none of them survived, at least no one would be responsible for anyone's death.

If you were the captain, what would you do?

"All sunshine makes the desert."

—Arabic proverb

"Ask the experienced rather than the learned."

④ Dilemma

Mariana has struggled in science class for years. This year, to help motivate her, Mariana's parents have told her that if she receives a B on her report card, they will help her buy a cell phone. But Mariana has done poorly in the class and knows that her final grade will be a D. The day her report card is due to arrive in the mail, Mariana arrives home from school and is greeted by her parents with hugs and smiles. She takes a look at the report card and sees that her grade in science is an A. Clearly this is a mistake, but Mariana can get away with it if she doesn't say anything. The cell phone is only part of the reason that she's tempted not to say anything. She also dreads the idea of seeing the pride on her parents' faces vanish.

What would you do if you were Mariana?

3 Grammar

Present Hypothetical Conditionals versus Past Hypothetical Conditionals

We use present hypothetical conditionals to talk about imaginary situations. The simple past tense is used in the *if*-clause. *Would*, *could*, or *might* is used in the result clause.

If you **asked** me my opinion, I **would tell** you the truth.

If we **knew** where she lived, we **could send** her flowers.

We use past hypothetical conditionals to talk about things that did not happen in the past. They are often used to express regret or criticism. The past perfect is used in the *if*-clause. *Would have*, *could have*, or *might have* is used in the result clause.

If I **had tutored** him, he **might have passed** the test.

(But I didn't tutor him, so he didn't pass the test.)

If Audra **had been** honest, she **would not have gotten** into trouble.

(But Audra didn't tell the truth, so she did get into trouble.)

Implied Conditionals

Sometimes the *if*-clause is implied rather than stated directly.

We **would have helped** you. (if you **had asked** us)

I **would have called** the police. (if I **had been** there)

What **would I do** without you? (if you **weren't** here)

As If / As Though for Unreal Situations

We can use *as if* and *as though* + a past or past perfect verb to suggest that something is unreal or untrue.

He talks **as if** he were an expert in the field.

They act **as though** they *had not cheated* on the test.

Note: Either *was* or *were* can be used with the subjects *I*, *he*, *she*, or *it*. However, *were* is considered more formal and generally used in writing.

A. Rewrite each sentence as a conditional.

If my sister knew what happened, she would be mad at me.

7. Aisha didn't tell her parents about the problem, so they couldn't help her.
8. We didn't have time, so we didn't visit him in the hospital.

B. Write what you **would do**, or **would have done** in each situation. Use an implied conditional.

4 Conversation

Khaled: Can I talk to you about a problem I'm struggling with?

Majid: Sure. What's going on?

Khaled: Well, I've been working at a clothing store in the mall for a month now. Last week, I saw a guy I work with stuffing a shirt into his bag. When I asked him about it, he acted all innocent. Then this week, I caught him taking a pair of pants. This time he promised he wouldn't steal anything again and begged me not to tell the manager.

Majid: So what are you going to do?

Khaled: That's the problem, I don't know. If I told the manager, he would get fired.

Majid: Yeah, but now that you know about it, if you don't tell the manager, you'll be helping him get away with stealing. He's put you in a **rotten** position.

Khaled: I know. What do you think I should do?

Majid: The way I see it, if he's stolen twice before, he's likely to steal again. You can't trust him. Do you think he might even steal from the cash register?

Khaled: I wouldn't put it past him.

Majid: It seems to me that you may get yourself in trouble if you don't **blow the whistle on** him. Of course, it's your **call**, but if I were you, I would let the manager know.

Khaled: Yeah. You're probably right.

8 Reading

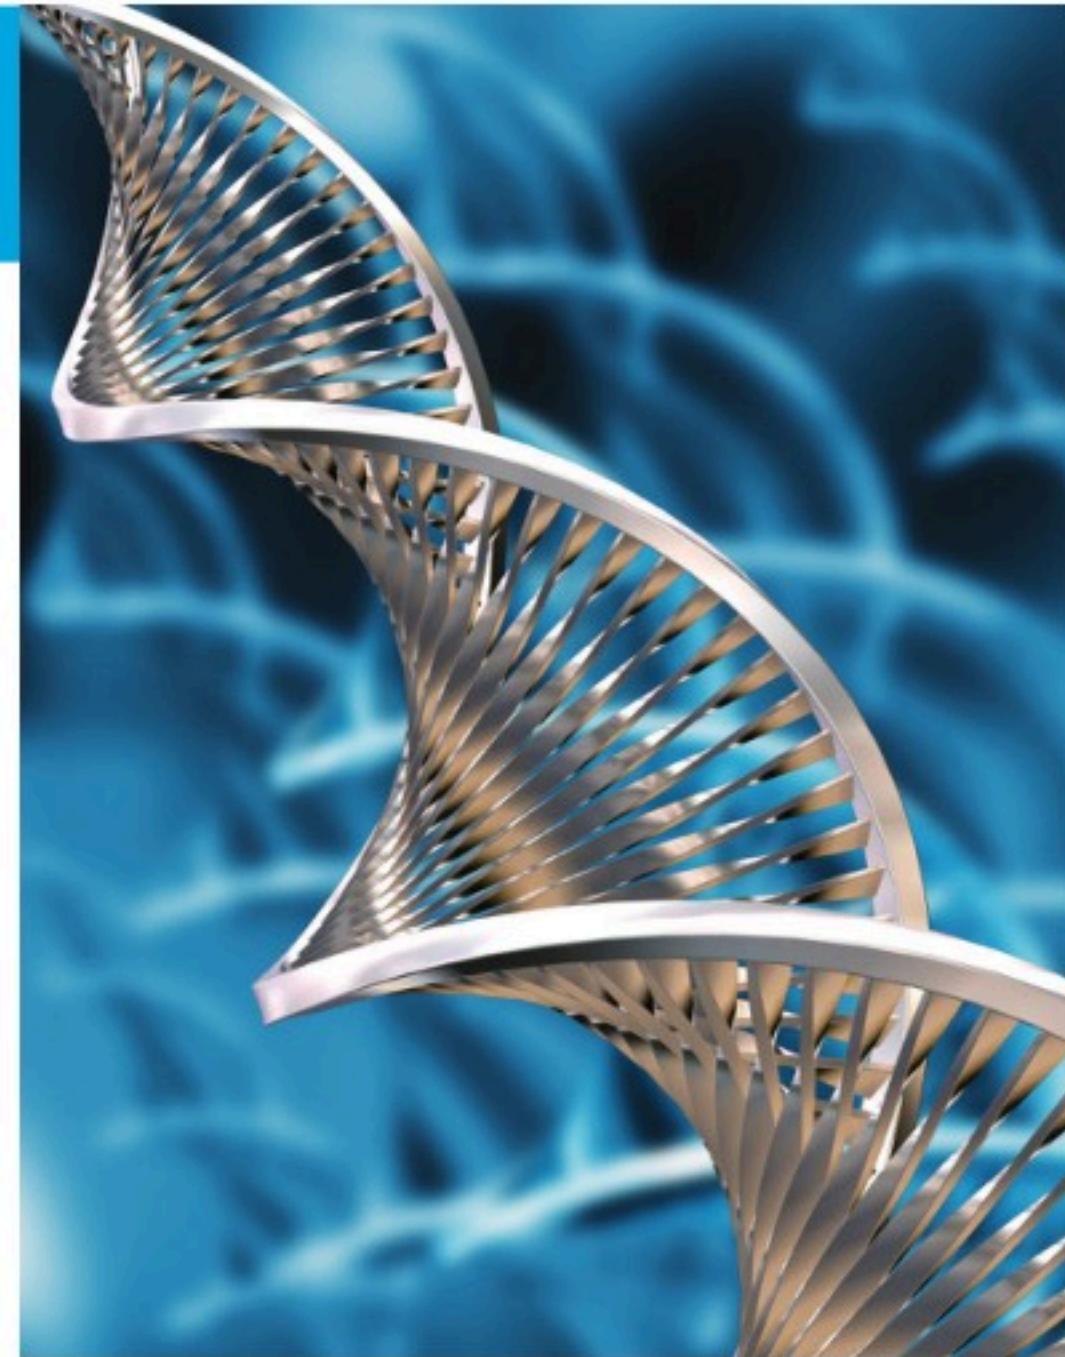

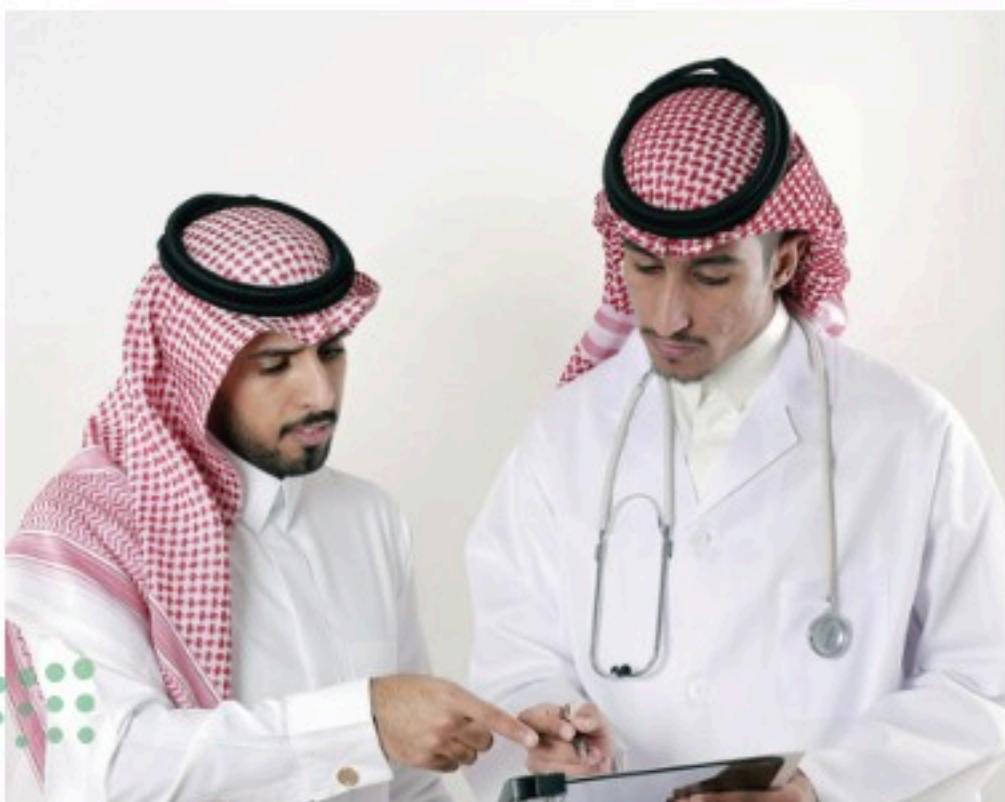

Before Reading

Read the article and underline all the potential diseases that can be identified using genetic testing.

Peeking into Our Medical Future

Did you know that a drop of your blood can predict diseases you may develop in the future? This is possible through genetic testing—testing that analyzes the genetic information found in the cells of your body. Each cell contains a sample of DNA. The information in DNA can help determine a person's risk of developing certain diseases years from now.

The most common type of genetic testing is called “newborn screening.” The goal of newborn screening is to identify treatable genetic disorders in newborn babies. In many countries, infants are screened in the hospital shortly after they are born. Although it is rare to find that a baby has a genetic disorder, those that do have a disorder start receiving treatment right away. This early diagnosis and treatment prevents physical and mental problems, and sometimes even death.

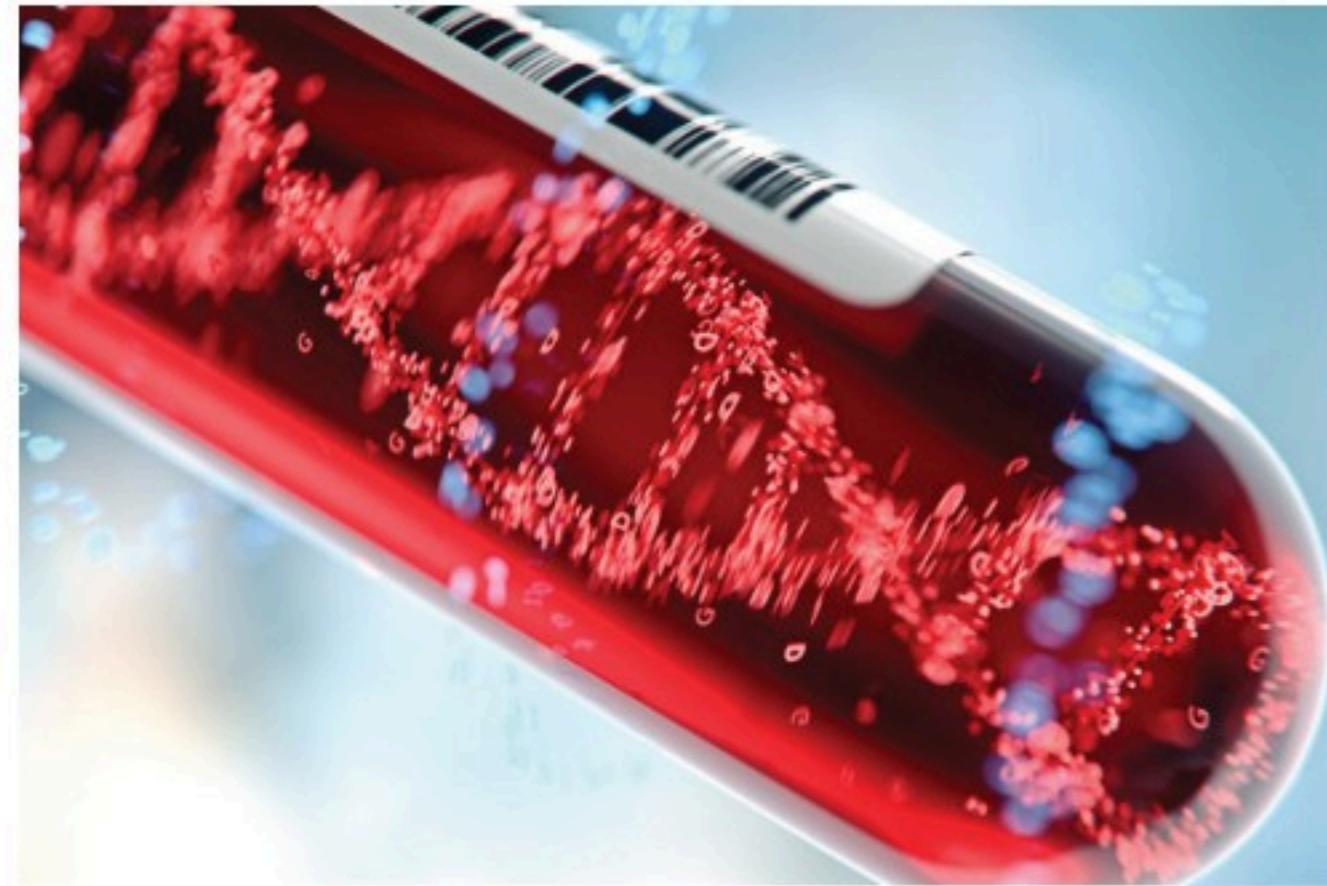

Another type of genetic testing is called “predictive gene testing.” This is used to predict an adult's risk of developing certain diseases later in life. People who undergo this type of genetic testing are usually from a family in which many members have had a particular inherited disease, like certain cancers or Alzheimer's disease.

There are many obvious benefits to this kind of testing. A negative test (a test that says a person is not likely to develop a disorder) can bring a tremendous sense of relief. Jen Thomson, who recently underwent predictive gene testing for colon cancer, explains, “So many people in my family died of colon cancer, I worried constantly. When the test came back negative, I felt as if someone had lifted an enormous weight off my shoulders.” A positive test has benefits as well. It warns of the need for preventative care, like frequent checkups, dietary changes, medicines, or even the option of surgically removing the part likely to develop the disease. For example, if Thomson's test had been positive, she might have chosen to have her colon removed.

There are also some controversial downsides to genetic testing. The value of genetic testing is particularly questionable when testing for a disease that is untreatable. For example, Alzheimer's disease runs in An Lee's family. An has decided to get genetic testing to see if she is likely to develop it. Her husband Bao is not happy about her choice. Bao explains, “If the result is positive, how will it help to know that she will probably develop the disease?

If I had the Alzheimer's gene, I wouldn't want to know." Another issue is that even if someone tests positive for a disease, it doesn't mean that they will definitely develop the disease. So a person could spend years worrying about something that never ends up happening.

Genetic testing has the potential to impact millions of lives in the future. Many are excited about the future of genetics, while others have deep concerns about it. But for better or for worse, soon we may all have the ability to peek into our medical future.

After Reading

Answer **true** or **false**.

1. _____ To get a sample of DNA, doctors must draw a large quantity of blood.
2. _____ Newborn screening is not a common type of genetic testing.
3. _____ Predictive gene testing can be done for treatable and untreatable disorders.
4. _____ A positive test generally brings great relief to the test-taker.
5. _____ If someone tests positive for a disease, they will definitely develop the disease.

10 Writing

A. How do you think people decide on a field of study or a job? Which factors affect their decision/choice?

1. Read the text and find out.

- What did the writer originally want to study?
- Why did he give up his original plan?
- Why do you think he took different training courses?
- What had he done to qualify as a language teacher?
- What other job opportunity did he have?
- What prompted him to make his final choice?
Does he regret it?

2. What would you have done?

3. Read the text again and find out.

- Are all the events presented in chronological order?
How do you know?
- Which sentences/phrases/words provide information about the writer's thoughts, attitude, and feelings?
- Which part reveals the writer's position on the matter?
- Are there sections/phrases/sentences that address a longer period of time in real terms but very briefly?
- Are there sections/phrases/sentences that address a shorter period of time in real terms but in greater detail?

After I finished school, I chose to try out a number of things before settling on one field of study or profession. I had originally wanted to go to art school but had changed my mind when I found out how hard it was for graduates to find employment. I was also reluctant to go ahead with it, because I knew that my father was likely to disapprove in a quiet but very noticeable manner. He wanted me to study medicine, but I didn't.

I took a number of courses in typing, shorthand, French, art, design, and literature and worked part-time as a public relations assistant, a shop assistant, etc. Eventually, I started studying psychology, philosophy, and linguistics. I had also managed to attend a teaching methodology course that qualified me as a language teacher, but I was not at all certain that I wanted a teaching career.

At some point, I was approached by a new airline company that invited me to do an interview, followed by a test before I could be offered a job. At the time, I used to help out with registration at a large language center where my uncle taught. So, I agreed to spend the next few days working for them from morning till evening, totally forgetting the airline company. Two days later, the man I knew from the airline company turned up and accused me of being irresponsible because I had not bothered to check with the airline company on the final results and a job offer. He said there was still time to do it, but I would have to drop what I was doing and run. For some reason, I did exactly the opposite; I stayed put, thanked him and went back to work.

Later that evening, I was offered my first teaching job by the director of studies. I have often wondered what my life would have been like if I had chosen the airline company instead, but not too enthusiastically. Regardless of difficulties and ups and downs, this is the choice that has become a life's choice and no amount of wondering is likely to ever make me regret it.

B. 1. Think of an important decision you or a family member has made.

- Compare what your life is like now to what it would have been like if you or a family member had made a different decision. Use the chart to organize your ideas.
- Write a personal narrative on this subject.

| Life Now | How Life Would Have Been Different |
|----------|------------------------------------|
| | |

A Life-Changing Decision

After I graduated from high school, I had the choice of going to a university in my hometown, or going to one far from home. I chose to go to the university far from home. Although I am happy with my choice, sometimes I feel as if I live a million miles from home. If I had chosen differently, it would have led to a very different life for me...

Writing Corner

When you write a reflective and speculative personal narrative, think about the following:

- what has already happened
- what opportunities were available and what results have taken place
- what feelings and attitudes you have experienced
- which people were involved directly or indirectly
- how to present your ideas so you can set the context clearly for your reader

Then refer to the real context and:

- reflect and/or evaluate the decision/choice you made.
- wonder/speculate how things might have been different.
- address the question to your reader.
- express satisfaction or regret about your decision/choice.

11 Form, Meaning and Function

Future Progressive

Use the future progressive (*will* + *be* + present participle) for continuous actions in the future.

Used to + the base form of a verb is used to talk about an action that was repeated habitually in the past but no longer happens now; and to describe a past situation which is no longer true.

Tom **didn't use to** cheat on school tests. He **used to be** an honest person. He **used to study** hard. He **used to be** a good student.

Note: For the negative, use *didn't use to* (omit the *-d*).

2 Reading

Before Reading

1. Do you think it is possible to move objects with your mind? Explain.
2. How do you think technology could help make this possible?

Mind Over Matter

Imagine yourself sitting on the couch, exhausted after a long day, wishing you had the TV remote control. Wouldn't it be great if, instead of getting up to pick it up from the coffee table, you could use your mind to turn the TV on and flip through the channels? This idea may sound like science fiction, but it may not be as far-fetched as it sounds.

The ability to move objects with the mind is known as *telekinesis*. It has long been speculated that people use only a small portion of their brains. It is said that if we used the full potential of our brain, we would discover that it has amazing abilities, including the ability to move objects without touching them.

One person famous for her alleged ability to use her brain this way was Nina Kulagina. Kulagina, a Russian housewife born in 1927, caused a sensation in the 1960s and 70s with her alleged mental powers. Kulagina demonstrated her ability in a number of experiments, many of which were filmed. In one experiment, she separated the yolk and the white of an egg dropped into a tank of water. In her most incredible experiment, Kulagina used her mind to slow a frog's heartbeat until it stopped completely.

Many in the scientific community are skeptical about whether Kulagina's powers were real or just a trick. However, many of these same people believe it is entirely possible for the brain to move an object—with the help of technology. For decades, scientists have been working on finding

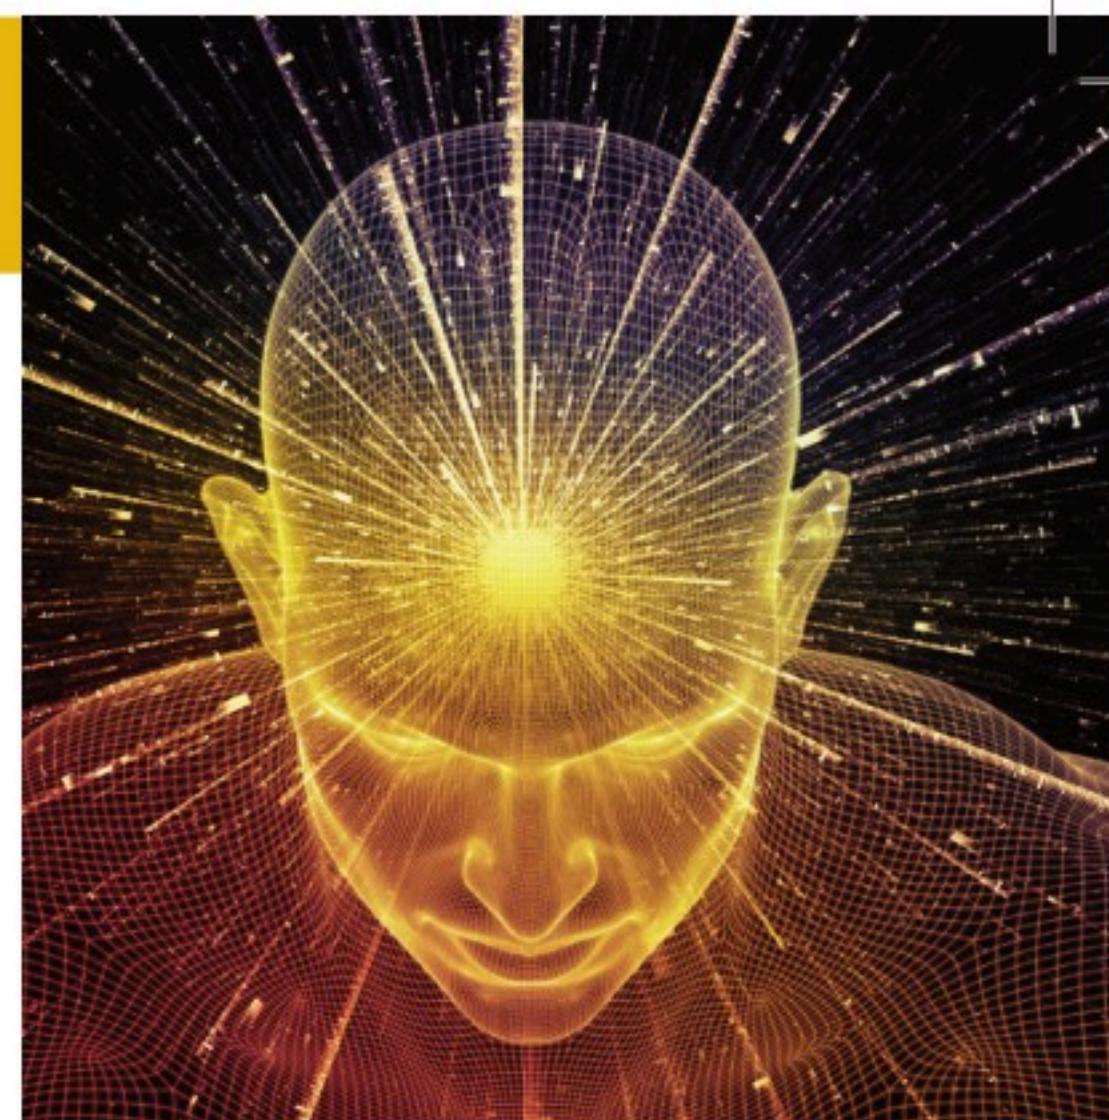

a way to make it possible for disabled people who do not have use of their hands to control devices with the brain. Recently, great progress has been made in this effort.

In 2004, a paralyzed 25-year-old man named Matthew Nagle became the first person to benefit from such technology. Nagle had a chip that could read his mind implanted in his brain. Wires connected to both the chip and a computer fed the information from the chip into the computer. The computer analyzed this information, and converted it into computer commands. The computer then sent these commands to various devices in Nagle's home.

As a result, Nagle was able to do things like turn the lights in his home on and off, and open email, just by thinking about doing these things. The hope is that one day this technology will make it possible for people like Nagle to regain the use of their arms and legs.

Recent research has focused on making this technology simpler by replacing the computer chip with a cap. Brain waves can be picked up by the cap and sent to a computer, which then carries out the commands. The advantage of this approach is that the cap is wireless and does not require surgery. However, further research is needed to make this wireless technology as effective as the brain chip.

While this technology has the possibility of dramatically improving the lives of disabled people, there are also many less dramatic, commercial uses for it. For example, one company is developing a remote control that can be controlled with thoughts. So the next time you are feeling too lazy to get off the couch to get the remote control, take heart—soon you may indeed be able to stay on the couch and turn on your TV without lifting a finger!

Writing Prompt

Write an essay about a new kind of technology. It can be a technology that is already in use or that will be used in the future. Explain the technology and tell the reader whether you think it is a good thing or not, and why.

Write Your Essay

1. Decide what technology you want to write about.
2. Use two or three sources from the library or Internet to find information about the technology. Use a note-taking chart to keep track of your sources and the information you find in each.

| Source | Notes |
|--------|-------|
| | |
| | |

3. Write a draft of your essay.
4. Have a partner read and comment on your draft. Use your partner's comments and suggestions to revise your essay. Include a list of the sources you used in your final draft.

Developing Your Writing: Taking Notes and Citing Sources

Take notes on key facts and note the source of the information. It is important to put the information in your own words, rather than simply copying text word for word from your source. Copying the words of another writer and using them as your own is called *plagiarism*.

Include a list of your sources at the end of your essay. If the source is a book, write the name of the author, the title of the book, the city and name of the publisher, and the year it was published. If the source is a Web page, write the name of the author (if known), the website title, the title of the article, the date you found the page, and the URL of the page.

Robotic Surgery

You may think of robots as things that only turn up in science fiction, but robots are actually a part of everyday life. Robots are used for many different tasks. For example, robots are used to manufacture cars, to explore space, and to assist the military and police officers in dangerous situations. And believe it or not, now robots can even be used to perform surgery on patients ...

J READING

Read the article about the White House. Then answer **true** or **false**.

The White House is the official residence and main workplace of the President of the United States. It is in Washington, D.C., and was built between 1792 and 1800. The White House has four stories—the Ground Floor, State Floor, Second Floor, and Third Floor, plus a two-story basement. Today, the White House Complex includes the Executive Residence (where the president and his family live), the West Wing (the location of the Oval Office), the East Wing, and the Old Executive Office Building, which houses the executive offices of the President and Vice President.

There are many famous rooms in the White House. The Entrance Hall is the primary and formal entrance. It is located on the State Floor, and is entered from Pennsylvania Avenue. It opens to the Grand Staircase, which connects the State Floor to the Second Floor of the building. There are three state parlors on the State Floor of the White House: The Green Room, The Blue Room, and the Red Room. They are each decorated in shades of their respective color and have been used for small receptions, and teas.

The East Room is the largest room in the White House. It is used for entertainment, press conferences, ceremonies, and occasionally for a large dinner. The White House's oldest possession, a portrait of George Washington that was painted in 1797, hangs in the East Room next to a portrait of his wife, Martha Washington, which was painted in 1878.

The State Dining Room is the larger of two dining rooms on the State Floor of the White House. It is used for receptions, luncheons, and larger formal dinners. The room seats 140 guests. The Family Dining Room is also located on the State Floor. The room is used for smaller and more private meals than those served in the State Dining Room. Today the president uses the Family Dining Room less for family and more for working lunches and small dinners. Family dinners are usually served on the second floor in the President's Dining Room.

Minaret of Jam, Afghanistan

The Minaret of Jam stands in a remote valley, surrounded by barren mountains. It was built in the 12th century and it is the only well-preserved building of the period. It is 65 meters tall and was built with baked-bricks. The circular minaret, which rests on an octagonal base, had two wooden balconies and a lantern at the top.

The minaret is famous for its intricate decoration of calligraphy etched in stucco and glazed turquoise ceramics. It was nominated Afghanistan's first World Heritage Site in 2002.

Salwa Palace, KSA

Salwa Palace is the largest palace in the historical at-Turaif district of ad-Dir'iyyah. It was the first palace built by Imam Abdulaziz bin Muhammad bin Saud in 1766. His successors later added to the complex, which includes 7 main units, a mosque, an audience hall, a treasury, and a well, which cover some 10,000 m².

Salwa Palace is a unique example of Najdi architecture and illustrates the ingenious use of adobe, not only as a material suited for the extreme desert climate, but as a means to create beautiful geometric designs. At-Turaif was inscribed on the World Heritage List in 2010. It has been restored to a large extent, and it has the potential to become one of the biggest living heritage museums in the world.

Burj Khalifa, UAE

Burj Khalifa in Dubai, at 828 meters, is the tallest building in the world, topping the previous record holder, Taipei 101, by 319 meters. It is also called "the Needle" because of its top section that gets as thin as a needle as it tapers to the top.

The building took six years to complete and was officially opened in January 2010. It has 168 floors, which is the highest number in the world, but not all of them are large enough to use as residence or office space. The skyscraper accommodates more than 900 luxury apartments, 49 floors of offices, and a 7-star Armani Hotel with 160 rooms.

The Boston Red Sox

Baseball, often called "America's Pastime," is considered by many to be the most popular sport in the U.S. One of the oldest and most famous baseball teams in the world is the Boston Red Sox. The club was founded in 1901, as one of eight teams in the American League. They were a dominant team in the new league—winning their first World Series in 1903. They won four more championships by 1918. Since 1912, the Red Sox's home ballpark has been Fenway Park.

The Sale Of The Bambino

While the first seventeen years in Red Sox history were successful, after the 1918 win, they went into one of the longest championship droughts in baseball history. In 1919, Red Sox owner Frazee sold famous slugger Babe Ruth, who had played the previous six seasons for the Red Sox, to the rival New York Yankees. Even though Ruth had just broken the single-season home run record, hitting 29 in 1919, Frazee sold him. Legend has it that Frazee did so in order to finance a Broadway play. Many people said that they would lose for 100 years because they had sold Babe Ruth, who was also known as the Bambino.

Evidence Of The Myth

Over the years, the Red Sox had many excellent players, but nonetheless, they were never able to win the World Series. They came closest in 1986, when they lost the final game in extra innings because a slow ground ball rolled through the first baseman's legs. This infamous moment in baseball history fed the myth that the Red Sox were destined to lose for the rest of their career.

Ending The Losing Streak

Finally, the losing streak ended in 2004, when the team won their sixth World Series Championship. Since 2003, the Red Sox have competed in five American League Champion Series, have won two World Series in 2007 and 2013, and have emerged as arguably one of the most successful Major League Baseball teams of the last two decades.

1. What is the name of the Red Sox home stadium?

2. How did the Red Sox do in the early years?

3. What started the myth about the Red Sox?

4. How did they lose the 1986 World Series Championship?

1. _____

A bat and ball sport played between two teams of nine players each. The objective of the game is to score runs by hitting a ball with a bat and touching the four bases arranged at the corners of a ninety-foot square or diamond-shaped field. Teams take turns batting and fielding. The fielding team tries to stop three hitters of the batting team from touching the base. The players on the batting team take turns hitting the ball that the pitcher of the fielding team throws. It has become the national sport of the United States.

2. _____

A team sport in which two teams of five players try to score points by throwing a ball through a hoop mounted on a backboard. The team with the most points at the end of the game wins. The ball can be advanced on the court by bouncing it while running or passing it to a teammate. Players are not allowed to take steps carrying the ball in their hands. Rule violations are called "fouls."

3. _____

It is a game that can be played by two or four players. The players hit a lightweight, hollow ball back and forth using rackets as they stand at the two ends of a hard table divided by a net. Players have to hit the ball to return it to their opponent after only one bounce. The pace of the game is very quick and players need to react accordingly.

4. _____

It is claimed to be the world's most popular martial art. A loose translation of its name could be "the art of the foot and fist" or "the art of kicking and punching." It combines combat techniques, self-defense, exercise, as well as philosophy.

5. _____

It originated in Britain in the late 19th century. It is usually played between two players (singles) or two teams of two players each (doubles). Each player uses a racket to strike a hollow rubber ball covered with felt over a net and into the opponent's side of the court. The surface of the court is usually clay, asphalt, or grass.

How to Write a Funny Joke

In order to learn how to write a joke that will make people laugh, you first need to consider what makes a joke funny. One common type of joke is one that shows the **irony** of a situation. This is when the listener's **assumptions** about the world are the opposite of the reality in the joke. In addition, you will need to consider your **audience**. You will get more laughs over different types of jokes with your friends at school than you will with your grandparents.

The Setup: Setting up your joke is important. The setup should tell the audience who the characters are. Also, if it's relevant, it should tell us where and when the joke is happening. Next, the joke should go on to explain the details of the situation. Be careful not to make your joke too long or too confusing. Keep it simple and **stick to the point**. Also, effective jokes have easy ways to differentiate the characters, like *the first man* and *the second man*, or *the father mouse* and *the young mouse*.

The Punch Line: The first rule in writing a good joke is that every joke needs a punch line and, more importantly, a *punch word* to make the audience laugh. The punch line *turns* the idea of the joke. Suddenly, the audience can see that their assumptions are different than the reality of the situation in the joke. In a well-written joke, the punch line is the last line of the joke, and the punch word is the last word of the punch line. This is important because otherwise people don't know when to laugh. They will start to laugh, but then stop because they will think that the joke is not over yet.

Looking at a Joke: Now let's look at the joke about the parrot that attends a lecture. It's on the first page of Unit 9 of your Student Book. The joke starts:

A student with a parrot on his shoulder leaves a lecture theater. Another student follows him...

This gives us a clear picture of who the characters are (a student, a parrot, and another student), where the characters are (outside a lecture theater), and when it is taking place (after the lecture).

The joke continues:

He stops him and says, "I'm sorry to bother you, but I have to say, I was astonished by your parrot's remarkable reaction to the lecture on ancient history. He seemed frightened at the frightening parts, sad at the depressing parts, fascinated at the interesting parts, and amused at the funny parts. I could have sworn I even heard it laugh. I have to say, I was amazed. Don't you find it surprising?" "Yes," he replies, "I was very surprised..."

This is the body of the joke. It explains what has happened. (The parrot was listening to the lecture and seemed to understand it.) It also gives us a clear picture of the other student's assumption (which is likely shared by the audience) that parrots shouldn't be able to understand lectures. The student's question "Don't you find it surprising?" **indicates** that he assumes the student with the parrot will agree with him, and when he says "I was very surprised" it seems to be confirmed.

The joke finishes:

He hated the class!

"He hated the class!" is the punch line, and "class" is the punch word. By mention of the word "class" the audience knows that the parrot can attend class, and the student thinks it's normal. This **juxtaposes** the assumption of the listener with the reality of the situation, which in turn, makes the audience laugh!

Read the account of a real incident that caused a lot of laughter and answer the questions.

My father was sitting at his desk, talking to a patient. He was a dedicated medical doctor and used to get very absorbed in his work. This often prevented him from noticing other mundane things around him, such as untidiness, worn out hinges, nails that were about to come off the wall, etc.

Anyway, he started looking for some medication that he had left on his desk. He was obviously not happy when he realized that someone must have gone in to tidy up in his absence, against his express wishes not to touch anything on his desk. Feeling quite annoyed he banged his hand on the desk, upon which the patient was startled and jumped up as a large painting that was on the wall over my father's chair and desk, came down, was ripped when it landed on his head, and ended up resting on his shoulders like a huge rectangular collar. Fortunately, he

was not hurt. It was a very old oil painting and the canvas must have been quite fragile.

The patient, who was initially horrified, stood there trying to suppress his laughter with my father glaring at him, livid with anger, until he stole a look in the mirror diagonally opposite his desk and saw himself collared by the painting, with his head sticking out. He started laughing so hard, they couldn't get the painting off him. And as this kind of laughter happens to be quite infectious everyone who was there witnessing the scene couldn't stop laughing either. He later said that the sight was so surreal, he could not help himself. He never had another painting above his desk after that, but would chuckle for months when he entered his office and saw the mark on the wall. He grudgingly let someone paint the wall nearly a year later.

1. Where did the incident take place?

2. Who were the people involved?

3. What caused the painting to fall?

4. Did anyone get hurt?

5. What was the doctor's initial reaction?

6. What caused him to start laughing uncontrollably?

H READING

Read the article and answer the questions.

Where in the world?

Many of the fruits and vegetables we see on our supermarket shelves today are cultivated in most continents on the planet. But this wasn't always the case. Have you ever stopped to think where these foods were first grown?

Date

Dates have been a dominant part of people's diets in the Middle East for thousands of years. The date palm, the tree on which the fruit grows, is probably the most ancient cultivated tree in the world and may have originated in the region we now know as Iraq. Today, dates are widely cultivated across Northern Africa, the Middle East, and South Asia. The fruit isn't only delicious, it's also very nutritious: it contains protein and vitamins, and is high in potassium and fiber. Saudi Arabia is now one of the world's biggest producers of dates.

Tomato

People often associate them with Mediterranean cuisine, but tomatoes are native to Mexico and Central America. The Aztecs grew them back in the eighth century. In the sixteenth century, Spanish explorers introduced tomatoes to Spain, and the tomato's popularity spread quickly throughout Europe. The French, Germans, and Italians absolutely loved them. But the British thought they were poisonous at first. In the nineteenth century, a British diplomat introduced tomatoes to the Middle East, and now Egypt is among the world's top tomato producers.

Orange

The fruit we know for its high Vitamin C content is actually a hybrid, meaning it was created by combining the genes of two fruits: the pomelo and the mandarin. Oranges are grouped into two basic types according to their taste: the sweet orange and the bitter orange. When most of us talk about oranges, we actually mean the sweet orange, which is the fruit we eat and squeeze to make fruit juice. Bitter oranges are used in Chinese medicine and to make marmalade. Oranges originated in Southeast Asia, in a region including the northeastern part of India, southern China, and northern Myanmar. Today, Brazil is the leading producer of oranges in the world.

Avocado

Long before the avocado became a trendy item on restaurant menus, it was cultivated by the Aztecs. The avocado is an oily fruit, rich in vitamins A, B, and C. The fruit does not get ripe on the tree. People need to pick it from the tree before it develops its flavor and full maturity. Sailors used to call avocados "seaman's butter," because the fruit lasts for a long time and it was good for sea voyages. A significant number of resources are needed to cultivate the fruit, since an avocado tree takes three to five years to start bearing fruit. Today, Mexico is the largest producer and exporter of avocados in the world.

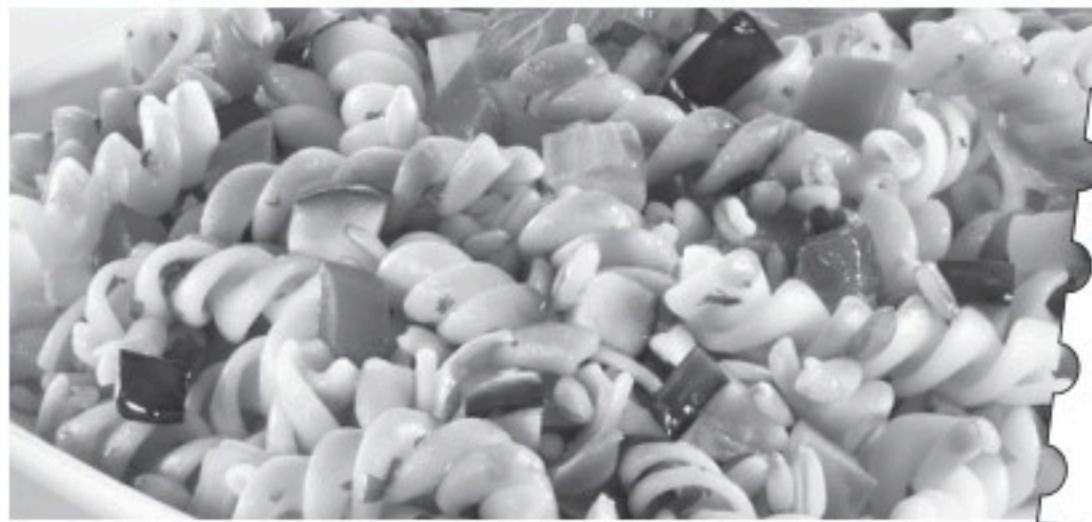

1. Why are dates considered nutritious? _____
2. How did Europeans react when tomatoes were introduced throughout Europe? _____
3. Where were oranges first cultivated? _____
4. Why were avocados called "seaman's butter"? _____

5. Which two Middle Eastern countries are among the world's leading producers of tomatoes and dates? _____

Mythical Animals

There are many animals that are mythical, or not real. It is agreed that most mythical animals, such as a dragon or a unicorn, truly are myth. However, with others, such as Bigfoot, the Chupacabra, and the Loch Ness Monster, there is more of a debate. Read on, and then you can decide for yourself if you think they are real or myth.

Bigfoot

There have been numerous sightings of a large, hairy creature known as Bigfoot. It is believed that this creature roams the forests of North America and looks like an enormous ape that walks on two feet. It is said that the same or similar creatures are found around the world under different regional names, most prominently the Yeti of the Himalayas. Witnesses have described Bigfoot as having large eyes and a large, low-set forehead. It is also reported to have a strong, unpleasant smell and enormous footprints. Bigfoot is believed to be omnivorous and mainly nocturnal. The scientific community considers Bigfoot to be a combination of folklore, misidentification, and hoaxes, rather than a real creature.

The Chupacabra

The legendary Chupacabra has puzzled zoologists for over 50 years. Stories of a strange beast drinking the blood of livestock were first reported in Puerto Rico in the 1950s. Since then, other sightings have been reported in Brazil, Chile, Mexico, and the U.S. Most eye-witnesses describe a beast that stands over one meter tall, which hops like a kangaroo on its hind legs. It is said to have leathery skin with long, sharp spines along its back. Witnesses also say that when alarmed, its red eyes glow and it gives off an unpleasant odor. Skeptics claim the Chupacabra is little more than a hoax or a mistaken identity, but others believe it actually exists.

The Loch Ness Monster

Thousands of people have reported seeing the Loch Ness Monster. This creature is said to live in the depths of the Scottish lake, Loch Ness, and supposedly resembles a dinosaur. The Loch Ness Monster first entered the public eye in 1933, when a newspaper published a full-page story about a couple who had been visiting Loch Ness and had seen a prehistoric animal with another animal in its mouth. Yet evidence of its existence is anecdotal, with minimal and much-disputed photographic material and sonar readings. The scientific community regards the Loch Ness Monster as a modern day myth, and explains sightings as a mix of pranks and wishful thinking.

1. _____ Many people think dragons are real.
2. _____ Bigfoot has mostly been seen in North America.
3. _____ Bigfoot looks similar to a goat.
4. _____ The Chupacabra attacks farm animals.
5. _____ The Loch Ness Monster is believed to live in a lake.
6. _____ Scientists think that the Loch Ness Monster is probably real.

The Great White: The World's Most Dangerous Fish

The great white shark is one of the oldest living species on Earth—it existed 350 million years ago. It is the largest and the most dangerous predatory fish, and it is the most feared by humans. Great white sharks can grow up to 20 feet (6 meters) long and weigh up to 4,400 pounds (2,000 kilograms). They have about 3,000 teeth arranged in several rows. They can also detect one part per million of blood in seawater.

Kohlberg's Theory of Moral Reasoning

A moral dilemma is a big problem or quandary that will have both positive and negative outcomes no matter what decision is made. *Kohlberg's Theory of Moral Reasoning* describes the development that people go through when making moral decisions. It has six sequential stages, meaning that they go in order, and that no stage is ever skipped. Kohlberg's theory is based on his research, which consisted of presenting the following *Heinz Dilemma* to his subjects and having them make a decision about what they would do:

A woman was near death from a special kind of cancer. There was one drug that the doctors thought might save her. It was a form of radium that a druggist in the same town had recently discovered. The drug was expensive to make, but the druggist was charging ten times what the drug cost him to produce. He paid \$200 for the radium and charged \$2,000 for a small dose of the drug. The sick woman's husband, Heinz, went to everyone he knew to borrow the money, but he could only get together about \$1,000, which was half of what it cost. He told the druggist that his wife was dying and asked him to sell it cheaper or let him pay later. But the druggist said, "No, I discovered the drug and I'm going to make money from it." So Heinz got desperate and broke into the man's store to steal the drug for his wife. Should Heinz have broken into the laboratory to steal the drug for his wife? Why or why not?

In order to determine which stage of moral reasoning each person was in, Kohlberg would focus on how they supported the decision they made, rather than the decision itself. The stages are as follows:

Stage 1: Obedience In this stage, the focus is on avoiding punishment. The rules for right and wrong are determined by parents and teachers. Example answer: *He should not steal the medicine, because he will go to jail.*

Stage 2: Self-Interest Subjects concentrate on their own needs and occasionally the needs of others. Fairness is present, but decisions are made based upon their own desires. Example answer: *Heinz should steal the medicine, because he will be happier if he saves his wife, even if he has to go to jail.*

Stage 3: Conformity People in this stage will emphasize being nice or good to gain approval from others. Example answer: *Heinz should steal the medicine because he wants to be a good husband.*

Stage 4: Social Systems People in this stage define right and wrong by doing one's duty to society. They are concerned with showing respect for authority and maintaining social order for its own sake. Example answer: *Heinz should steal the drug for his wife but also be punished for the crime. He should also pay the druggist what he is owed.*

Stage 5: Human rights In this stage, subjects are concerned with human rights. They try to define moral values apart from the authority of the group. Example answer: *Heinz should steal the medicine because everyone has a right to choose life, regardless of the law.*

Stage 6: Universal Human Ethics In the final stage of moral development, subjects follow self-chosen ethical principles that are valid and applied universally. Example answer: *Heinz should steal the medicine, because saving a human life is a more important value than the property rights of another person.*

1. Read the Heinz dilemma. What would you do if you were Heinz? Why?

2. Now read the stages again. Which stage of moral development are you in right now?

A. Read Carl's dilemma and answer the questions.

Carl was studying as his younger brother Sid played nearby. He had promised to keep an eye on his brother until their parents came back.

Suddenly, the phone rang; it was Mitch, Carl's best friend. Mitch wanted to come over and show Carl a new gadget that he had just bought. Carl looked at the time. He would have to get his brother ready for bed. This was all his idea. He had suggested that they stop using a babysitter as he could look after Sid. As expected, their father suggested that Carl get an additional allowance for his help.

Their parents were not due back for at least an hour. He needed about 20 minutes to feed Sid and then put him to bed, so that would probably leave another half hour if he didn't read a story to him. But without a story, Sid would probably refuse to go to sleep. He could, of course, give him that model car that he liked so much. It had small parts and it wasn't supposed to be safe, but Sid was very careful with things like that. A prized model car for a story...Was it a good deal? But he did want to see Mitch's new remote control for his game console. He was interested in using his extra allowance to buy one himself.

He decided to give the car to Sid. By the time he made up his mind, Mitch had arrived. Carl realized that he hadn't fed his brother. He asked Mitch to wait, went into the kitchen and warmed up some milk. He put some cookies on a plate and gave them to Sid. Sid took one sip of milk, dropped the cup on the carpet, and started crying. The milk was too hot. Mitch suggested they give Sid some ice cream to soothe him. So Sid had ice cream for dinner, and the model car. All was well.

When their parents returned, they found Mitch and Carl playing. They knew Mitch and were happy to see that Carl had company. They asked him if he'd fed Sid and put him to sleep.

Carl said he had. All of a sudden, they heard a choking sound from Sid's room and ran upstairs. Sid was sitting on his bed hanging onto the model car, choking on a part he had pulled off.

"Sid," said the mother. "It's all right, hang on. Why did you take Carl's car? I've told you not to."

1. What did the mother assume?
2. What was Carl's dilemma at that point?
3. Did Carl betray his parents' confidence in him? Why? Why not?
4. Did he betray his younger brother? Why? Why not?

B. Read the story again and make notes on each event and its effect(s).

1. Always use capitals at the beginning of sentences and quotations.
2. Use capitals for the names of cities, countries, rivers, lakes, mountains, universities, etc.

4. Most jobs don't need capitals.
5. Use capitals for every word in titles, except for articles, conjunctions, and prepositions, unless they are the first word.
6. Use capitals for the names of organizations, but not for their products.
7. Use capitals for nationalities, languages, and religions.
8. Use capitals for family words when they appear alone or followed by a name, but don't use them when the word has a possessive pronoun or an article before it.
9. Use capitals for the names of holidays and historical events.
10. Don't use capitals for school subjects unless they are the name of a language.

Error Correction: Unnecessary Words

When checking your work, you need to think carefully not only about whether or not words are missing, but also if some words are unnecessary, either grammatically or because they are repeating something you've already said. Look at the guide below to help you.

1. the: **The** is commonly included by accident when you are translating from your own language.

Remember, for example, that English doesn't use **the** before nouns when talking about things in general, or when talking about abstract nouns.

I don't think students should be given more homework.

Unemployment is one of the biggest problems in the developed world.

2. Prepositions: Sometimes a word in your native language needs a preposition before or after it,

but in English it may be unnecessary. Think carefully—are you writing in English or simply translating?

I went home at six o'clock.

(NOT: I went to home at six o'clock.)

3. and: Although it is not grammatically incorrect, we do not usually include **and** in lists

until before the final item.

I went shopping and bought a suit, three shirts, a pair of shoes, and a tie.

4. Words that have the same meaning: Be careful not to repeat yourself by using words that have

the same meaning. For example, something can be big or large, but saying *A big, large tiger* sounds very strange, because it repeats the same concept.

5. Contractions: Don't repeat words that are already present in contractions.

Jack's been to Kenya.

(NOT: Jack's has been to Kenya.)

Although your language may use the same punctuation symbols as English, it is important to realize that English may have different rules for using them. Punctuation in English can affect meaning, and poorly punctuated writing is very difficult for the reader to understand.

1. Periods: Use a period after statements and commands.

I've decided to change jobs. Make me a cup of coffee, please.

2. Question marks: Use a question mark after, but never before, questions. Don't use one after reported questions, use a period instead.

She asked me what time it was.

3. Exclamation points: Use after surprising pieces of information and exclamatory phrases or sentences.

I got a promotion! Oh, stop it! No way!

4. Quotation marks: Use quotation marks at the beginning and the end of direct speech. Other punctuation usually goes before the end of the quotation marks. Quotation marks are also often used to show the title of articles, poems, stories, etc.

Mark said, "I really don't think you want to do that."
Have you ever read "The Road Not Taken" by Robert Frost?

5. Apostrophes: Use apostrophes in contractions and in the formation of possessives.

- **after yes and no in answers**

Yes, I did. No, I haven't seen him recently.

- **to separate names of people in direct address**

How very nice to see you again, Mr. Smith.

- **after transitional expressions (e.g., for example, however, furthermore)**

Successful products today are truly international. For example, Microsoft programs are recognized all over the world.

- **to separate adjectives that modify the noun separately**

Gerry was tall, athletic, and very clever.

- **to separate quotation marks for direct speech from the rest of the sentence**

"I'm bored," Tim said. "When are we going to do something different?"

- **to separate clauses**

As soon as I get to the office, I'll send you the report.

- **to separate non-defining clauses from the rest of the sentence**

Tony Wakefield, who came to Mexico in 2009, is a director.

- **to separate interjections**

Don't use commas:

Sounding Natural

When you speak in English, it's important to try to sound as natural as possible. Ways of making your English sound natural include fillers, which are words and phrases that don't really mean anything, but which speakers often use to open a sentence or give them a little extra time to think. Other ways of sounding natural are to take turns in a conversation instead of dominating it, and to make sounds which show that you're interested in what the other person is saying.

| | |
|----------------------------------|--|
| Fillers | Uhmm... Well... Right... You know... I mean... OK... |
| Take turns | What do you think? What about you? And you? Do you agree or...? |
| Showing signs of interest | Really? Oh, yes. Uh-huh. Is that right? |

Fahd: _____? I thought you only had four.

Ali: No, no. I have five, and you have five too, don't you?

Fahd: Yeah. _____, I'd like to go to Malaysia again and go to the beach. _____?

Ali: _____, I think I'd like that too. We could go back to that hotel on the beach, _____,

PowerPoint and Poster Presentations

When preparing a presentation, it is important to bear in mind the audience and the time available for the presentation. Most people tend to try and pack too much information into a short time. However, the key is to be selective, and present things that the audience is going to be interested in or intrigued by.

| | |
|--------------------------------|---|
| Preparation | <ul style="list-style-type: none">• Brainstorm ideas on the subject and make notes or audio record.• Research and collect information from different sources.• Select the items of information that you would like to present and make notes about them, using your own words. |
| PowerPoint presentation | <ul style="list-style-type: none">• Use sheets of paper to make rough sketches of how you want to present your subject.• Use one sheet for each PowerPoint slide. Limit bullet points to about 4 or 5 items.• Include photos or drawings.• Use smaller cards for your personal notes with more information about what you plan to say to your audience.• When you use your computer, you can transfer your notes to the space provided on each PowerPoint slide, which only you can see (not the audience).• Use your sheets to practice/rehearse your presentation.• If you are working in groups, share the sections of the presentation and the number of slides out equally, so that each member of the group will present/speak for approximately the same amount of time. |
| Poster Presentation | <ul style="list-style-type: none">• Cut out different-sized pieces of paper for your text or bullet points.• Cut out photos from publications or print them out.• Try out different layouts on a large sheet of paper or cardboard to decide how you are going to compose your poster, what colors you are going to use, font size or handwriting, shapes, etc. Stick things in place temporarily, using tape that can be removed easily without damaging the paper or cardboard.• Hold up your poster or put it up on the wall/board to check that it is not too crowded and that texts and photos are clearly visible. Make any changes you think are necessary before finally sticking things into place.• If you are working in groups, share out sections of your presentation equally. |

A. Work with a partner. Choose a topic, e.g. a sport like the ones you have read about or are familiar with, an activity, a place, or an object/device. Choose no more than 5 points to present with one or two photos/visuals. Present the topic to your partner. Comment on and evaluate each other's presentation.
